New Measurer of Heat May Lower Coal Bills

Pittsburgh, Pa., Oct. 18 SUPER - SENSITIVE "heat meter," which is said to be able to measure the quantity of. heat given out in a minute from one two-hundred-and-fifty thousandth of an ounce of burning coal, was under demonstration here in the laboratory of the American So-ciety of Heating and Ventilating

Engineers at the Bureau of Mines. The instrument, perfected after five years of experiment, is ex-pected to aid in decreasing the coal bill of the American householder by furnishing him with the ac-curately measured "heat loss" values in various types of building material and methods of building construction.

DRY LAW POLL

Illegal-Wet Move Was Opposed by Both Parties

KANSAS CITY, Mo., Oct. 18 (Special)-A proposal to repeal the prohibition enforcement laws of Missouri has no legal status and is not entitled to a place on the constitutional ballot to be submitted to voters at the election Nov. 2. North T. Gentry, Attorney-General of Missouri, has ruled.

branch of the Association Against the Prohibition Amendment. Public sentiment, regardless of party lines, has been so aroused against the proposal that its defeat by a heavy majority has been predicted.

Now comes the formal ruling of Mr. Gentry that it fails to come within any section of the state initiative or referendum laws. It has no legal status as an initiative pro-posal, he ruled, since it introduces neither new nor substitute legislation. Also, the ruling holds, the petitions for submission of the propo-sition were not filed within the speci-

fied time for referendum moves.

The opinion of the Attorney-General is the proposition should not be submitted to voters of the State. As the proposition already has been printed on the ballots in some of the counties, however, it is held by Charles U. Becker, Secretary of State, that an order from the State Supreme Court will be necessary to halt sub-PHILADELPHIA, Pa., Oct. 18 Court will be necessary to halt sub-

NO CANADIAN IS FAVORABLE TO ANNEXATION

Mr. King Makes Definite Statement - Gives His Views on Conference

By Cable from Monitor Bureau LONDON, Oct. 18-W. L. Mackenzie King, Prime Minister of Canada, Interviewed by The Christian Science Monitor representative here, discussed fully and frankly the problems which the Imperial Conference has before it when it meets here tomor-row. He welcomes, he said, this conference as an opportunity for com-mon council upon questions of joint concern to the self-governing dominions, but deprecates the supposition that any far-reaching changes are likely to be involved. He regards the British Empire Constitution as a matter of gradual evolution, and does not favor the introduction of mechanical changes, though the conference may record new stages of growth that are being reached.

So far as Canada is concerned, its relations with Great Britain were never more smooth, and there is no new question that the Premier has to raise. Trade development within Attorney-General Rules It of labor from Great Britain and capital from all available sources are matters he has deeply at heart. Asked whether the question is to come up of appointing Dominion rep-Office, upon the lines already adopted by Australia, he said this was, in his opinion, a subject entirely suitable

Rum-running Question

Asked, whether the rum-running question in connection with British imports into Canada was to be discussed, he said that Canada had a big problem owing to illicit smuggling from its territories into the United States, and this came up at The repeal proposal, known as Proposition No. 4, has been sponsored by the wet interests of Missouri under leadership of the state Canada where the governor-general Cafiada where the governor-general being appointed by Great Britais was concerned, he indicated that there was much to be said for the con-thuance of the existing system. He also made a cordial reference to Lord Willingdon, whose appointment to this post he warmly approves.

Asked his opinion regarding the

stories of the movement for the annexation of Canada by the United States, he declared he had not yet discovered a single Canadian who took them seriously, or who wished for anything of the kind. "I do not know a living soul in Canada who is know a living soul in Canada who is for annexation" was one of the ex-

earlier in the campaign to have the proposition tested in the courts. The League of Nations Council, ne said, takoff, Sokolinikoff and Gyevdoki
Attorney-General's ruling was made "I think that was settled some time to committee laid." on his own account and without solicitation from those opposing the proposition, it is said here.

Ago." Referring to trade questions, he said the Canadian people approved making recriprocal trade treaties with other parts of the Empire, repeal proposition have been formed those made with Australia and the British West Indies gave general satisfaction. There were bound to be minor difficulties, as for example the customs regulations in force in Canada prior to the conclusion those treaties but the desire he matters and make the treaties work

AMERICA GREETS QUEEN MARIE AND ROYAL SUITE

New York Extends Nation's Welcome to Monarch and Her Party

CIVIL AND MILITARY ENVOYS MEET VESSEL

Sight of Manhattan's Jagged Sky Line Fulfills Long-Held Wish of Visitor

By MARJORIE SHULER NEW YORK, Oct. 18-Queen Marie of Rumania landed in the United States today to the din and blare of a vociferous welcome from a democratic people to a democratic Queen. The coming of a queen may be a sufficiently rare event to provoke a deal of shouting in America, but the blare of trumpets, the cheers of the crowds, the whirring of the airplanes overhead were not the clamor ac-corded to a novelty, but the homage of a republic to a woman whose name spells romance and beauty and

Almost her first words uttered to the correspondents who went down to quarantine to meet the Leviathan were a plea to "Take me up into your hearts," and again and again during the triumphal procession up the bay to the City Hall and to the train which is taking her to Wash-ington she must have been certain that her desire had been granted.

"Every Inch a Queen" Every inch a Queen she looked as she came out of the door of her suite into the cleared space on the Leviathan's deck where the reporters were waiting. Her dress was of Burgundy crepe, worn under a rich coat of Burgundy velvet with a deep shawl collar of black lynx fur. Her little turban of cloth of gold was wrapped with folds of nut-brown crepe, and a saucy little pompon in the same shade of brown was tucked against the bobbed golden head with its swinging pearl earrings. She wore a necklace of very large pearls, and her costume was finished with shoes and stockings of parchment

tint.
But once she had walked through the corridor, disdaining the some-what regal chair of embroidered red and gold placed before a round mahogany table, and faced the questioners with her famous flashing smile it was the woman herself, her words, which held the close atten-

tion.

Commander Hartley of the Leviathan presented the reporters and before he had finished his sentence the Queen had cut in with close-cropped sentences, tumbling staccato style, with a speech showing a decided continental accent.

"I am very pleased to see you all together," she said. "It is a joy and a pleasure to be here." Then with a friendly little ripple of laughter, she added: "I have been told that you come out like this to meet people.

I am glad to see you."

e in Comi She stated her purpose in coming "In manufacturing, advances in to the United States succinctly: "I technology have for many years been want to thank you for all that you conspicuous; but even more impor- have done, not only for my country, but for every other country. I know

the world."

the hand: "I want you to take me up in your hearts. I have come to And then the questions began. She replied that she had seen the

Then came her plea, made with a

simple little outstretched gesture of

famous New York sky line, adding: "Indeed I saw the sunrise. There as nobody about then."
Asked if she intended writing articles while in the United States, she said: "I will try if I can. The people My pen is always active. I shall not pers, because if I began that I should be constantly at it. Then, again, I am not an official person, you know, "Research and testing laboratories and I think that my Government

likes me to keep to my own special line, which is charity, good will, peace between nations. A representative of a Jewish newspaper asked her about the treatment answered, "People are treated alike in Rumania." To a further question as to whether Jews are admitted to study in the universities, she said that "there have been difficulties," but the King is very fond of the Jews and the Jews have always been very

nice to me. Her smile again flashed into play when asked: "Your Majesty, is there one thing more than any other that you wish to see in the United States?"

Interested in Position of Women "I am a great lover of all beautiful especially I am interested in the poon of women in the United States and their work for peace, which is my great desire. I think we all have had enough of wars." She started to turn away and then wheeled around suddenly to admonish: "But the women must not quarrel among

Perhaps reminded by the fact that Queen Marrie has been called not only a maker of peace, but a maker of fashions and marriages, she was asked whether she cared as much

in articles written about her. "I don't spend the fantastic sums with which I am credited on clothes," she declared, and then with a little chuckle: "But I like to look nice,

like every other woman."

In reply to a question, she said that she did like American cuisine and only wished she had a bigger appetite, which led one enterprising reporter to try to measure her re-

puted liking for buckwheat cakes by the number of them which she could eat at a sitting.

"Only One at a Time "Oh, only one at a time," she said.
"I like to have everything served and then just eat a little bit of each thing so I can say I have tasted American dishes."

There was another plea for the right kind of a welcome as the Queen sought to terminate the interview by remarking:

remarking:
"I hope you all will consider me a real friend."

Then the Queen, Princess Heana, Prince Nicholas and members of her suite, accompanied by the Rumanian committee of welcome and repre-sentatives of the United States Government went out on the deck to face the battery of news cameramen. Princess Ileana wore a coat of dark blue corduroy velvet over a crepe dress the same shade, and a soft tam to match. The coat had a collar of gray fox fur, and her one-strap slippers and stockings were gray.

Takes Photographers' Orders The photographers had sent watch to the Queen and it had been presented to her on the way over, so that it was a royal thank you that prefaced her posing, as she responded readily and willingly to each abrupt command to "Face right here, now," "Look this way for just an instant, requests which were stated as tersely and directly as though she had been the merest commoner in all her king-

And then the Queen and her party. having received one coast guard cut-ter filled with the official welcoming party for Rumania and the United States, and two cutters filled with representatives of the press. was ready for the city's greeting, which came with the welcoming party sent down on the Mayor's yacht, the Macom. Already the royal baggage had been shipped off on a tug, and the royal visitors descended to the deck manian consul-general at Chicago. the Macom for the trip up to the

WOMEN'S CITY CLUB TO HEAR MR, BUTLER

Russian Balalaika Orchestra Also on Week's Program

William M. Butler, United States enator, and Republican candidate or re-election, will address the Vomen's City Club of Boston at or re-election, Ford Hall this evening. Next Wednesday evening, in Ford Hall, the Russian Balalaika Orchestra will give a concert for club members and their guests. The orchestra is directed by Prince Irakly Tour-manoff, formerly a member of the Royal Guard. It includes 11 Balarations of plans for the proper re-ception and entertainment of Her

laika players, a pianist, a Russian dancer, and a soprano soloist.

The Balalaika, which forms the basis of the orchestra, was originally used only by the Russian peasants, but so sweet and soft is it in tone, and so capable of producing wonderful harmonies, that it was in-troduced into the cultured classes by Empress Alexandris, who saw it: NORTHAMPTON, Mass., Oct. 18 (Special)—The Rev. Arts-Sciences Enrollment Shows Largest Gain in the University

Better compensation and an increasing demand for more qualified teachers are considered largely reconsible for the 18 per cent increase in the enrollment of the Harvard Graduate School of Arts and Graduate School of Arts and Sciences, according to official regis-tration figures just published. The gain is from 750 students last year to 881 this year, making the largest increase in any single branch of the

A large proportion of the students entering the School of Arts and Sciences are preparing themselves to be teachers, and the numbers are naturally determined to some extent. it is pointed out, by the economic law of supply and demand. It is noted that during the last few years the demand for young college teach-ers has been so uncommonly brisk ted that during the last few years all over the country that men who have hardly finished their postgraduate studies now find it possible to obtain positions at double the salaries that were offered to instructors 10 year ago.

Total Enrollment Fgures Showing a total increment of 400 over registration of last year, enrollment figures are given out as fol-

Early Windsor Chairs

were so well fashioned that they have stood the test of a century or more of daily use. Unfortunately most modern Windsors are but poor imitations.

In a good Windsor chair, the splay of legs requires that the tenons of the posts come clear through the seat and be wedged through the tops. The spindles should be made of hand split hickory so that they may have resilience and yet strength. Soft maple, elm, walnut or pine are the traditional woods for Windsor seats.

In making Danersk Windsors we preserve not only the outward form but the true principles of construction which give durability. No handmade chair suitable for libraries, clubs and business offices can be offered for less than the Danersk hand-made Windsors.

LABOR OFFICE ENDS SESSION

Better Relations Between **Employers and Workers** Are Predicted

By Special Cable

GENEVA, Oct. 18-The investigation of the question of the scientific nanagement of business ought to him to speak on the question.

ead to better relations between emlead to better relations between employers and workers, according to Mr. Sokal, the Polish delegate, speaking at the conference of the govern-Office, which concluded its teliberaons on Saturday. Leon Jouhaux, the French workers' delegate, agreed, and said that if employers would grant an eight-hour day, workers would support their demand for increased production.

Albert Thomas, director of the In-

ternational Labor Office. was given authority to continue negotiations with various institutions interested in the plan for the establishment of in international institute for na-ional organization of production, and this means that when the vice firector, Dr. Harold B. Butler, arrives in the United States on the orthcoming mission of inquiry into American methods of business, he will get in touch with the committee of the Twentieth Century Fund, Boson, which has already shown keen interest in the foundation of such an institute.

Collaboration With America

abor Office indeed realize that they can employers and employees, if the investigation of scientific manage ment is to be of any value. The International Labor Office is holding into another subject, in which American opinion is inter ested, namely, the existing regulations regarding forced labor in native countries, regarding which an inquiry committee of colonial experts has been appointed by the Interna-tional Labor Office.

A letter was laid before the gov erning body from William Green, president of the American Federation of Labor written before the meeting of the Council of the League of Na ons in June, which suggested that international conference should called to draw a new convention ainst slavery. Since then the ague itself has dealt with the mat-League Itself has dealt with the mat-ter by making a draft convention. Mr. Thomas therefore considered that Mr. Green's request would best be met by asking the United States' collaboration in the International Labor Office committee to study the question of forced labor. Mr. Thomas ded that he would welcome an merican expert on this committee.

American Labor's Attitude eplying to the objection that the nerican Government would take no ment of such expert, Mr. Simpson, rica, Oct. 18 (R)—Two Americans Canada, pointed out that the key-have begun a lonely three-year vigil canada, pointed out that the keystone policy of the American Federation of Labor was loyalty to the Government of the United States and he
quoted the words of Samuel Gompers
to this effect. It is certain, therefore,
said Mr. Simpson, that the United
States Government would seriously
consider any proposal to which the
American representative agreed. It
was finally decided to ask the advice
of the expert committee how far Mr.
Grean's request could be met.

The eight hours' question again ame up at the conference, it being ecided to appoint a committee to adrise the governing body what it hould do to obtain further ratificaons to the Washington convention Mr. Thomas, defending the Labo Office against workers' criticisms, said that the situation was not really so bad as made out. Although there was only one additional ratification, that of Belgium, since the last time the subject was discussed, the eight

general rule. Employers' Opposition Alleged The real stumbling block, declared Mr. Thomas, was the opposition of the employers, whose duty it was to live up to their own declarations of good faith by pressing the govern-

hours' day was in fact becoming a

ments for further action. F. L. Poulton, England, and M. Jouhaux, France, readily agreed to this diagnosis of the situation. The governing body will deal with the question again in December. Signor D'Aragona, the Italian workers' delegate had a startling story to tell of a group of workers who were thrown cut of their homes because they refused to become Fascists. When Signor De Michaelis, the Italian Government representative replied that the house-owners turned them out, Signor D'Aragona retorted that the house-owners received orders to do so. He indeed hinted that as he had to go back to Italy, it was not easy for

next international conference of Labor include unemployment insurance, the prevention of accidents and sickness insurance which were first will come up for final discussion and for framing draft conventions on these questions. Nothing was decided about calling a special conference on eight hours at sea, this question being referred to a joint maritime

FRENCH REJOICE

Anniversary Greeted With Felicitations-Great Advance During Past Year

By SISLEY HUDDLESTON By Special Cable

PARIS, Oct. 18-The anniversary of Locarno did not pass unnoticed in Paris, and although doubts and criticisms are mingled with felicitations generally France rejoices in the new direction taken precisely a year ago on the banks of the Swiss lake. In itself the Locarno pact might have litically united. About the ratifica been unimportant but it was the starting point for better relations the European peoples, and the work of reconciliation has steadily been pursued until rapproche-ment between France and Germany has been effected on industrial and commercial grounds by the formation of the steel trust and the signing of an economic treaty, while even financially there is now a proposal that Germany should come to the aid of France, which is struggling

with monetary difficulties Diplomatically the whole course of France has changed, for the special agreements with central European countries which were inclined to be hostile to Germany have become futile. France and Germany realize the tile. France and Germany realize the necessity of working together for the readjustment of war liabilities whether called reparations or debti They have become conscious of their common quality of debtors, wherea France until recently was chiefly conscious of its quality as creditor.

Admission of Germany Locarno has led to the admission sentiments, to the Thoiry interview, to the possibility of the early evacuation of the Rhineland, and generally to a complete reversal of the former cion, and the substitution of a policy based on co-operation. Whatever practical results are immediately or remotely possible, or impossible, it is certain that any observer who has happened to have been absent from France for a year would be amazed on his return today, a year after Locarno, at the different attitude.

Strangely enough, it is especially in the last few months, under the premiership of Raymond Poincaré, who was mistakenly regarded as the implacable enemy of Germans, that Locarno has really borne fruit. It is probably helpful in the sphere of foreign affairs that a man of M. Poincaré's patriotic rigidity should be in power, for his approval disarms opposition.

The Radical Congress, which con-

Higher Standards Advocated For Fairs in New Hampshire Despite Steps Taken to Raise Them in the Past Season Many Complaints Are Made of Midway Attractions and Gambling Devices they patronize them that they are sure to be "trimmed." "Our fair would not pay expenses if it were not from the sale of midway space that our revenue is augmented," said one of the largest managers. "We would like to clean out the fakirs and run a strictly agricultural fair, but to do so we must have some source of revenue besides the legitimate gate receipts and space rentals. We figure to run a midway and leave it to the authorities to see that it is run on the level.

continue to provide opportunities for illegally taking away the farmers' ney, notwithstanding all efforts to culture and the State Legislature have endeavored to raise the standard of agricultural fairs so that they might become what they were crist. might become what they were originally intended to be—exhibits of products of the soil—but the influence of midway attractions and petty gambling devices has in many in-stances offset the worthy efforts of

the agricultural authorities.
With regard to conditions Andrew L. Felker, State Commissioner of Agriculture says:

ome justifiable criticisms may be made of the tendency to lower the standard of the fairs by catering too much to a low type midway. There is a tendency, however, to eliminate much of the questionable entertainment of the midway which we are glad to note. Through the co-operation of the Mayor of Rochester, the fair officials, several of the clergymen and the city solicitor, a much cleaner and more respect-able fair was made possible at Rochester than has pertained for

some years. Room for Improvement

"The same might be said of most of the other fairs, yet there is much room for improvement at all of them. We believe that the fair managers should work together under some form of agreement, the results of which would eliminate nearly all of the objectionable features. We have sufficient laws if needed to correct and prevent such attractions as may be proven to be harmful or immoral

lic opinion is rallying for cleaner mands will surely be met and en-forced when the beneficial influence will be reflected upon the lives and characters of our young people." Complaints of gambling at country

fairs have been made from year to year at the fairs at Rochester, Union Grange fair at Plymouth, Belknap county fair at Laconia. Lancaster fair, Hopkinton fair, Greenfield fair, Bradford fair and Twin State fair at

The smaller fairs such as take Sandwich, Hanover, Lisbon, New Boston and Bedford are not devoted to midway attractions so much as they are to the display of the products of the farm, where many thousands of farmers attend and take fair managements "need the money" furnished attractively. From 1728 and etiquette, Miss Margaret With- until 1775 they served under seven REACH NEW RECORD ington of Simmons College; "Your royal and three acting governors.

The First Corps of Cadets, said to be the oldest active military organization in the United States, will celebrate the 185th anniversary of the granting of its charter tomorrow with a review before Governor with a review before Governor Fuller on Boston Common and a long program of events including an address by the Governor at the Cadet Armory on Columbus Avenue in the evening.

Led by Lieut.-Col. Horace Z. Landon and his staff, the Cadets will leave their armory at 4:30 p. m. and march around the Common by way of Columbus Avenue, Park Square,

and trophies won by the corps and by individuals will be made. A buffet supper will be served and the eve-ning will be concluded with an en-

future business career.

For the girls, there will be five rooms for the teaching of the domestic arts, while 10 studios will be devoted to freehand and mechanical drawing. The plans include a library and a spacious gymnasium. The gymnasium, it is expected, will be a detached building, facing City Hall the First Motor Corps, and honorary members. Maj.-Gen. Francis Henry Appleton, retired, will lead the veterans. John Fielding will lead the Cadet band.

After the Governor's address, presentations of non-commissioned officers, warrants nine-war medals.

> FINDS VERMONT RURAL SCHOOLS PROGRESSING

service.

MONTPELIER, Vt., Oct. 18 (Special)-Vermont has made more progress in rural school improvement than any other State in the Union during the last five years, in the opinion of Dr. A. E. Winship of Boston, editor of the New England Journal of Education, expressed at the end of a week's trip through the State with Clarence H. Dempsey, . Commissioner of Education.

Commissioner Dempsey met Dr. Winship at Brattleboro last week on Monday. The Rev. A. W. Hewitt of the State Board of Education was with them on part of the trip and Deputy Commissioners of Education Sheldon and Batchelder went in the parts of the State they have under their immediate supervision. Addresses were made by Dr. Winship and Mr. Hewitt at Brattleboro, Casleton. Burlington, and Newport. The normal training schools and normal training classes also were

STATE CAMPAIGN IN FINAL WEEKS

Race Now Enters "Home Stretch" With Candidates "Stumping" Every Section

Massachusetts candidates for state and national offices today entered the "home-stretch" of this year's race for political preferment. Intensive, direct campaigns in all parts of the Commonwealth were begun under direction of both Republican and Democratic state committees.

The appeal to the people is to continue for the remaining fortnight of the campaign, election day being two weeks from tomorrow. William M. Butler and Governor Fuller, Republican candidates for United States Senator and Governor, respectively, and David I. Walsh and William A. Gaston, Democratic candidates for the Senate and governorship, have engagements for speaking practically every day between now and election, and on most days for several speeches.

The Republican State Committee to-

Th Republican State Committee to day sent out what is termed the Re-publican Industrial Flying Wedge cked stump speakers compose the three units into which this campaign feature is divided. These speakers will go into all parts of the State to tell the people that Massachusetts is dependent upon industrial activities to continue and to build up the prosperity of the State. Special plea will be made for the made for the support of Senator utler as a proof to the country that Massachusetts indorses President Coolidge's Edministration.

Talking Picture of President

"President Coolidge in Action." alking motion picture of the Chie Executive making an address and discussing national economy, will ac-company the first unit, which is in charge of Arthur Corbett and George Hibbard. This party started for Osterville, Falmouth, and other Cape Cod towns, where rallies are to be

Charles J. Hodsdon, formerly legislative agent of the Massachusetts branch, American Federation of Labor, has charge of the second speak-ing unit on industrial issues in the campaign. This unit devotes today campaign. This unit devotes today to New Bedford, Senator Butler's home city, and tomorrow to North Attleboro, while it will work in Worcester Wednesday and Thursday. Watter Barnes, formerle an executive officer in the Textile Workers Union, is in charge of the third unit, which spends today and tomight in Salem and Lawrence, in which datter refly the industrial apericars will remain through Tuesday and part of Wednesday, going to Lowell Wednesday.

Mr. Oppenhelm contested the Suf-

which he was in charge of Pacific coast ports. Following the war, Captain Carmine was stationed at Boston but was transferred in November, 1922, to the Pacific coast.

Captain Carmine highly praised the efficiency of the service in this district. While in command at New York he directed several successful campaigns against rum-runners off the New York Teams of the Suffolk County apportionment on the grounds of alleged inequalities of representations affecting especially his district in Brighton. The motion to dismiss was presented in a hearing Saturday by J. Weston Alien, counts for Francis X. Sheehan, and the other members of the Suffolk County redistricting board.

MASONIC OFFICERS TO MEET Masters and wardens of the Fourth are planning their annual ladies night, to be held Nov. 12 at the Sir Frederick Whyte Says Obstacles Are Many But Outlook Is Promising

Democracy in India, considering the comparative novelty of British institutions and the progress made by Indians in adapting themselves to the political policies of England, is fairly promising, declared Sir Frederick Whyte, in his suite at the Hotel Touraine today to a representative of The Christian Science Monitor. Sir Frederick, who is in Boston to deliver a series of six lectures, his first tonight in Huntington Hall, under the auspices of the Lowell Institute, was the first president of the Indian Legislative Assembly.

Obstacles still remain to be overcome in democracizing India, Sir Frederick said, of which the two most serious drawbacks are: One, the esafts to solve India's problem. He painted the Indian's mind so far as its political compartment goes as a

BOSTON ASSURED OF AMPLOWATE

Metropolitan Commissioner Sees Little Danger of Vital Shortage

The Metropolitan District Com-nission does not consider that a rater shortage for Greater Boston s possible for two and perhaps more sars, Davis B. Keniston, chairman the commission, said today. Rea-

Heavy snows and rainfall or such as were received would relill the Wachus

would refill the Wachusett Bash from its present low level of 365 feet above the Boston base to more than last year's maximum height of 385 feet. Mr. Keniston pointed out, perhaps even close to the overflow level of 395 feet. Even should the winter's precipitation be light, the reservoir san be drawn to the 330-foot level with safety, he said.

While ordinary caution in the use of water is desirable, the commission does not believe there is any ground at this time for urging consumers to observe any rigorous economies, the chairman said. He believes it would be possible for residents of the metropolitan district to cut their water consumption almost in half if the occasion demanded.

Water economies can be effected, he remarked, by checking up all pipes and faucets for leakage. If all householdiers will report leaky pipes at once, and the municipalities take care to keep their mains in good condition, this will aid materially. Drinking fountains which now run continuously could be made more economical by being equipped with spring faucets. The person who fills his bathtub till water runs out the drain could perhaps be satisfied with a hub half full. If further economics should prove advisable, aconsiderable saving can be made in sprinkling of lawns and gardens next summer, the commissioned added, but he emphasized that he does not expect this will be necessary.

WELLESLEY RECEIVES

optimism to say that conditions are favorable on the whole. Of course, there are difficulties, but we are progressing fairly well." At this point Sir Frederick paused to point out the newness of politics in India, and that it has only been during the last generation that there has been any thought given to politics like that in England and America, and also that the Indian National Congress is only 42 years old.

"There is little political tradition and things which are the very senance to Americans and English-

tection of the good will of the Government of Mexico."

Charles W. Hackett, professor in the University of Texas, an expert on Mexican matters, thinks that it was on this hasis that Sener Devi was on this basis that Senor Pani won the case for the Mexican Government and converted the American State Department to a more antee the rights of Americans, and sympathetic consideration than that all other foreigners, as it was that f mere property rights, legally con- of Mexican citizens, but that it could

Madero and Carransa

and sovereignty," and be able "to formulate and sign such treaties as Both Francisco Madero and Venustiano Carranza were large landholders. President Madero was thinking rather of political rights than of eco nomic justice for the millions of peons, but these peons cared very much less for political rights than for economic justice, and they forced his hand in the matter. However, his lack of interest and dilatoriness in starting any real redistribution of the land which Porfire Diaz had concentrated into less than 1000 great estates, resulted in the uprisings led by General Carranza in the north and General Zapata in the south.

When General Carranza came into power in 1915, he issued a decree on the division of the land to the people, declaring it was designed to re-lieve the "state of misery, abjection and actual slavery in which this enormous multitude of laborers has lived and still continues to live," and asserted that its design was "merely to give the land, which it lacks to day, to the miserable population, in order that it may fully develop its right to life and liberate itself from the economic servitude into which it

This decree provides for nullification of all illegal dealings and for the restoration of such communal by the Constitution, and second by lands alienated under the Diaz ad- the justice and equity of the cases ministration, as were necessary to under question if the Government of the people of the villages, with pro- the United States would recognize r the expropriation and gift it as a constitutional sovereign naof land to such communities as had tion and submit the cases to such

This decree not only gave President Carranza popular support last agreed to do, with the result throughout most of the Republic, but that all titles valid before the enactbecame also the foundation for pro-wisions made in the famous Article on May 1 of that year, were to be 27 of the Constitution of 1917 cover- guaranteed against any retroactive ing the agrarian question. The pro- laws. of that article do not differ materially from those of the Carranza decree so far as agricultural lands are concerned. Modifications made since then relate more to the manner and machinery of effecting the distribution than to the intention to make such distribution.

20,000,000 Acres Go to People Up to date, more than 20,000,000 acres have been appropriated to the agricultural communities, under the provision for the division of large estates, and it is being distributed in small homesteads, rather than in the ancient communal ejidos or communal holdings of the old In-

dian days.

From the very first, the hesitation of the United States Government to recognize that of President Obregon was based upon differences of view-point over the land and other property questions, for American pro-prietors were concerned in this redistribution of farms to the people. The American Government demanded that strict legality be observed, that all land expropriated should be paid for in cash at its actual face value, and that the deliberations usually indulged in when legal machinery is set in motion should be punctiliously bserved. It failed to take into ac ount the fact of revolution and the for hundreds of years had been de-On the other side, the Mexican

immediately objected to expropria-tion on the basis of the sum fixed by the owner for taxation, and also de-manded that cash be paid for American holdings and not 20-year bonds upon which 100 per cent cash could not be collected at the time it

was issued.

The Mexican Government contended that it was fair to take the lands at the valuation placed upon them by the owners themselves when they dealt with the Government in the matter of taxation, and offered both to accept bonds for payment of all governmenta bills and to seek a loan for indemnification in cash then Americans were concerned. Finally the United States yielded

a point and accepted the Mexican contention that ir view of "revolu-tion and consequent disturbances" the Mexican Government could proceed with expropriations that when land was taken for "not constitute a precedent for Mexico, enticing her to expropriate any other kind of property for any purpose except upon indemnificapurpose except upon indemnifica-tion for the just value thereof at the time of taking having been made in

other works by the composer. These arid stretches Mr. Liebling made loud and overly vigorous. Again, his reading of the work was fragmentary, without sufficient grasp of the music as a whole. Music by Chopin drew from him far more attractive interpretations. When he turned to the delicate sections of the F sharp major Barca-rolle or the F minor Ballade he wove

musical texture of gossamer light-ness. Purling threads of melody in-termingled, and skilled, accurate pedalling enhanced tonal values. One can hardly approve the orna-mentations which Mr. Liebling has added to Chopin's A flat Impromptu To music so decorative in the original, the superimposed arabesquer add little in effectiveness and nothing in musical value. Yet it is only just to record that Mr. Liebling played them lightly and briskly and with smoothness.

Mr. Liebling completed his pro-gram with three works by Liszt, and a group of his own compositions which included "Ode to Spring." Study in Octaves, an Impromptu, a Toccata, and "Lucifer's Song." The their mutuality of ensemble, are sueven. Some of his playing was mas-terly and interesting. The remainder was heavy and ponderous, even dull. listen to as to look at. It occupied two hours, but these passed quickly might easily have resulted more

NATIONAL

vesled a few really dramatic mo-ments. The remaining lesser parts, that of Goro, played by Mr. Curci; the double rôle of Vamadoro and The the double role of Vamadoro and The Bonze by Mr. Cervi, and Miss Falco's Kate Pinkerton, were understand-ingly encompassed.

At the conclusion of the opera, the

ballet associated with the company presented some rather charming di-

In the evening, the opera was Verdi's "Il Trovatore." The cast:

Decidedly it is far more interest ng to hear than to see this old favorte of operagoers. So many scenes re set with stiff choruses that there is little action on the stage. But so much of the music of this opera still enjoys a definite popularity that its clusion in any company's repertor s well-nigh imperative. Miss Jacobo made a very dramati

sonora, singing with much expres siveness in the tense scenes of th drama. Her voice was resonant and vibrant, and she imbued the rôle with dignity and power. In contrast was Miss de Mette as the Gypsy, Asucena. The surging angers of Asucena were well depicted through glowering looks and other visible signs. But Miss de Mette is too much the artist to warp her tones in such ndeavor.

The remainder of the cast proved neither spontaneous por particularly apt in their interpretations. An artificial concoction, much of the acting evening was itself forced and stilted a little below the standard main tained this season by the company.

John McCormack

John McCormack, tenor, sang a Symphony Hall yesterday afternoon Edwin Schneider served as accom-panist to Mr. McCormack and to James Liebling, the 'cellist, who was the "assisting artist" of the program. The sight of such a tre audience as came yesterday to hear the famous tenor is in itself hearten ing. It was an appreciative audience great singer enthusiastically, and

his assistants cordially.

Some well-chosen music made up the major portion of the singer' program. From the oldest of operas Bach's impressive "Let us but rest was a marvel of artistry. Respighi "I tempi assai lontani," and two interesting songs by Bantock came next. Bantock has set his music to some Chinese poetry written 1200 years ago. The first is called "A Dream of Spring," and has the lightest and finest of musical textures. The second poem, "Desolation," draws a clear musical picture by

its mood maintenance. The folk songs chosen by Mr. Mc Cormack were varied in content and "Would God I Were the Tender Apple-Blossom," with its sophis-ticated text set to the Londonderry air, and the elaborate accompanime of "I saw from the Beach" seem not in keeping with the inherent simplicity of folk music. But other folk songs were simpler and more

Even to the more ordinary of the ongs in his repertory Mr. McCormack brings the wondrous clarity of enunciation, the smoothness of phrase and the expressiveness of style which have always been his. If his singing yesterday was not con-stantly in as clear a tone as he has shown here at other times, he was still the superb artist and musician throughout.

President and Postmaster-General Determined to Stop Robberies

Special from Monttor Bureau WASHINGTON, Oct. 16-Increase protection of the United States me was discussed at the meeting of the President with his Cabinet, and notice has been served both from the White House and from the Post forces of the government, will be early history, the anchoring near called upon, if necessary, to protect this island of the British fleet on the the valuables entrusted to the public eve of the battle of Valcour and the

President Coolidge, it was stated at the White House, is supporting Harry S. New, Postmaster General, in his program for more adequate pro-tection of the mails by the employ-ment of additional armored cars and possible defailing of groups of me possible detailing of groups of ma-rines to guard shipments. Large quantities of currency are frequently sent by parcel post, it was explained, and drastic action is contemplated by the Government to insure safety. "If it takes the Army and Navy to do it the United States mails must be protected and the lives of postal

employees safeguarded," declared Mr. New. He informed the Director of the Budget that the Post Office Department would ask for increased appropriations for armored cars and armed guards, and announced that he would recommend to Congress legislation making it a capital offense to attack the United States

An appeal was sent out by the Post Office Department for banks and large industries throughout the counincentive for robberies by refraining from sending large shipments of currency through the mails. A number of federal reserve banks, he stated, are accustomed to transmitting huge sums of currency to plants having large payrolls. He requested that payment, whenever it must be made through the method. payment, whenever it must be made through the mails, be made by check

Mr. New in a letter to John W O'Leary, president of the United States Chamber of Commerce, said: sums for pay-roll purposes would pay by check instead of in currency it would, to a considerable extent at least, obviate the necessity for these tempting shipments. It does not even it is the custom of such a plant to receive money shipments from its city bank, not only on a certain day. but often by a particular train."

WILLIAMS TO HAVE **NEW ART MUSEUM**

WALTER OLSEN

AU QUATRIEME Represents Today

A position of such importance as that occupied by AU QUATRIEME today is not achieved by chance. It rests on accomplishments that cannot be ignored. Where else, indeed, can one choose . . . and choose correctly, with decorative certainty . . . on a single floor everything needed for an entire house? Not only furniture, table glass, lamps, mirrors, but architectural objects of the first importance, mantelpieces and the panellings of entire rooms. Nor are the smaller decorative objects for desk or dressing-table forgotten. The stocks of 16th, 17th and 18th Century antiques from France, England, Italy, Spain and America are unbelievably great, including both the fine furniture of these countries and the quaint provincial and peasant pieces, the rugs, the faiences, the decorative paintings and the old lighting fixtures. A great room is devoted to the important collection of antique tapestries alone.

Things of Fresh Interest ranged with important furniture and decorative objects of the 17th and 18th Centuries, rich in color

One of these is a beautiful early 18th Century pine-panelled room from a house in Cork Street, London, which has just been installed, with its carved chimney-piece its cornice doors chimney-piece, its cornice, doors and window-embrasures all in-

Another is the group of in-teriors arranged in the manner of a French country house . . . two rooms panelled with old boiseries and another decorated with rare old Directoire wall paper panels, "Les Français en Egypte." The old marble mantel-niers and the decorative orner. piece, and the decorative ornamental mirrors are other objects of interest in these interiors, arranged to the smallest detail just as one might actually find them.

In the Belmaison Galleries are on view three sets of old Chinese Landscape papers of extraordinary beauty and veritable

The Spanish House has been edecorated throughout and ar-

and picturesque ornament as only the furniture of Old Spain could be.

The American House interiors are filled with furniture and objects of fresh charm and merit...old maple chests and beds... the rude and primitive pine cupboards and benches of our earliest settlers... and the fine mahogany of good 18th Century houses.

Belmaison's Decorative Role

Belmaison is also an important part of the story . . with its authentic reproduction furniture . . . its wealth of decorative materials, many unobtainable elsewhere, French percales, English chintzes, hand-blocked linens and the like . . . and its equipment to solve every decorative problem down to the smallest detail, whether it be for the French, English, Italian, Spanish or early American interior.

CHICAGO — Indicative of the
trend of the times in adoption in
the professional, industrial and business worlds of codes of standards
of practice, the American Photo
Engravers' Association, with headquarters here, has given wide circulation to its own statement of ethics
which includes conciliation, arbitration and mutual concession rather
than force in the settlement of disagreements.

Justice and fair dealing should characterise every transaction "in the conduct of our business and in our relations with our competitors, our customers, and our employees," the code, of ethics states.

Other Outstanding Citations Other outstanding citations are: "Prove to our competitors that we are as sincere and honest in all natters as we could wish them to be. "Take no advantage of the igno-

range of a customer, nor allow our employees or salesmen to do so, "Refrain from and discourage the practice of disparaging the equipnt, output or personality of a com-

Maintain such a friendly attitude loward competitors as will enable you to meet them and discuss frankly the means whereby wily and un-perupulous buyers may be effectively

ouraged. 'Refuse to pay bribes or 'commis-ions' to buyers, purchasing agents or others who may thus be induced to place orders with us. Business so equired is sure to develop unde-

trable characteristics. When a new photo-engraving stablishment enters the competitive field, it should be the duty and pleasure of those already in the field to establish, as early as possible, the most cordial and friendly relations with the management. Show clearly a desire to be of friendly service in avoiding possible pitfalls, and in other ways evidence a sincere friend-

Inculosto Highest Ideals

maintained a sufficient body of trained workman in this growing industry, and that it is the duty of overy employer to do his share in this most important work. Therefore, the selection of apprentices should not be left to chance, but rather be given the careful study of the employer himself, to the end that the industry be not harmed by the introduction of unsuitable or uncastrable men.

At the Guild of Boston Artists there is a giving of drypqints and etchings by Frank Benson. They are the most recently published of the prints by this artist.

SAYS PROHIBITION

IS NOT PARTY ISSUE.

"Let the shoto-engraver be ever lights to Lug It in Absurd ligent in business; quick to persive the good and alert to repel NEW HAVEN, Conn., Oct. 18 (P) of others; as quick to take blame as to place it on others; courteous and considerate of others, particularly if they be less fortunate than him-self; in every way a true American centleman."

ART

Harley Perkins Exhibits This is one of those rare occasions when the reviewer holds forth and becomes the reviewed. We have been aware of Mr. Perkins' talent as a painter through many exhibitions in which he has appeared in the past. Now he exhibits in solitary fashion.
A good show indeed at Doll and
Richards', on Newbury Street.
That Mr. Perkins prefers to

emerge, or shall we say, go off on a tangent toward newer ways of seeing and saying things, is a fact that is regretted by some of his friends. Being a "modern", is not an easy matter in Boston, where a taste for the traditional is deeply rooted. Those who break away and come up for freek air and sunlight seem to for fresh air and sunlight seem to show a lack of appreciation and respect for the past, to say the least. It is a little late new, however, to apologize or attempt to account for the "modern" viewpoint for it has been accepted for what it is worth by the more energetic artists of the day. Nor are they under any illusions as to its unlimited possibility. Being modern seems to them to be a way of adding freshness of vision and method to what has gone before. And it is just this exhilarating quality that we sense in the work of Mr. Perkins and the younger group to for fresh air and sunlight seem Perkins and the younger group to which he belongs.

An excusion north during the summer was a productive one. Wherever the artist goes he brings himself to his subject, and so we discover Canada and Maine through the individual imagination of this artist. There are rambling roads, rolling hills, angu-lar rooftops, solidly constructed firmly composed against backgrounds

ENGRAVERS' CODE of luminous, clouded, gray skies There is a consistent continuity in the surfaces that fold into one another. The patterns are blocked out with a vigor in the relationship of the parts to one another. The effect in most instances is a strong and penetrating one. One picture called "Spires" has astonishing strength in the placing in slightly varied attitudes a group of pointed trees.

In the matter of color, Mr. Perkins has let the brighter tones of his earlier pictures give way to more neutral, less obvious effects. Color is less a surface matter, an impressionistic consideration, now it enters deeply into the structure and form,

deeply into the structure and form it is part of the building material The artist searches for something that is more than a mere decorative effect. He abandons the apparent and searches for the hidden significance. There is a roughness in the character of the picture as a result, almost a merciless neglect of detail. Things are sought out for their broader aspect, for their symbolic connotation of human emotion and experience. It is not a small ambition on the part of the painter. He must always be alive to situations. He must constantly be prepared to adapt a suitable technique to the demands of the situation. This is scarcely in accord with the formula methods of the academically trained. that is more than a mere decorative the academically trained.

Mr. Perkins has succeeded in certain pictures more than he has in others in presenting the essential character of the subject. There is enough fine material, however, in this exhibit to establish him as one of the truly significant "moderns" in New

Boston Art Notes

the Vose Galleries in Copley Square, there are shown some decor-ative flower paintings by Hammond Ahl. This ariist find; in the group-ing of the beautiful garden flowers attractive arrangements that lend themselves to the more ornamental

themselves to the more ornamental type of painting. He is generous in the use of rich color that emerges luxuriously from the floral patterns. At the same gallery there are shown some interesting etchings by various artists, including Norman Clark, Charles Cain, John Dix, Carl Rungius, Blampied, and Margaret Kirmse. In a third exhibiting room there are on view oil paintings by various artists. Among them is an interesting landscape by N. Fechin who made his Boston debut last season

At the Casson galleries in Copley Square there are the oils by Ettore Caser. This painter lends romance

Inculcate Highest Ideals

"In our dealings with our workmen let us ever be mindful that there is resting on us, as employers, a grave responsibility. For we should by example and precept endeavor to inculcate the highest ideals of manhood and character, and emphasize the responsibility of every thinking man as a citisen of the United States of America, for the rightful discharge of his duties thereunder.

"A fair wase for a fair day's work should be the thought in fixing the rates of pay of our employees, having also due regard to general living conditions.

"We should recognize that only by training all the apprentices which rade customs allow, can there be maintained a sufficient body of rained workmen in this growing in-

Representatives John Q. Tilson of Connecticut and Fiorella La Guardia of New York, speaking at a Republican rally here yesterday, declared that prohibition was not one of the issues of the present political campaign, despite the "efforts on the part of Democratic leaders to make it to its advantage and the advantage of empire consolidation to

"It is absurd to lug in prohibition as one of the campaign issues." Representative Tilson said, pointing to the division on that question among the Democratic and Republican legislators. islators in Washington.

"This is not a party issue," he continued, "for there are just as many 'dry' Democrats as there are 'wet' ones and just as many 'dry' Republicans as there are 'wet."

Representative La Guardia said he was making no promises as to repeal of the Eighteenth Amendment

"THE COMMON LAW"

Violet Oakley's New Murals Shown in Philadelphia

Philadelphia Special Correspondence

HE title, "The Opening of the Book of the Law," has been given by Violet Oakley to her series of 16 mural panels for the Supreme Court of Pennsylvania, shown for the first time in the copy of the Supreme Court Room in the Pennsylvania State Building at the Sesquientennial Exposition.
This copied room was specially built

to exhibit these paintings by Miss Oakley, together with the reproduc-tions in color of her previous work for the Commonwealth of Pennsylvania, comprising the 18 panels for the Governor's Reception Room, "The Founding of the State of Liberty Spiritual," and the nine panels for the Senate Chamber entitled ."The Creation and Preservation of the Union." This new series is the climax of what would generally be regarded as a life work.

Although Miss Oakley was commisioned in 1911 to execute the murals, her research work in amassing the material for the historical survey has been in progress since she first took over the colossal task of painting the decorations for the various chambers of the State Capitol.

Her search through the libraries taught her that, strange as it might seem, no consecutive history of world law was ever compiled. She tells how she journeyed to Oxford, and how in one of the famous libraries, armed with a note of introduction to the head librarian, she made known her modest wish to read a history of the law. Simple though the request might seem to the artist, the librarian was nonplussed. Such written. And so there began the long search through many tomes such as Sir Thomas Maitland's

Materials for a History of the Law. The more the artist read about the law, the more convinced she became that its development was virtually a law's advance through the centuries, in the Peace Palace at The Hague. and playing upon these notes de-veloped the theme of her mural "The c

The notes, as they appear in paint, with "Divine Law," and passing through the "Law of Nature," "Revealed Law," "Law of Reason,"
"Common Law," "Law of Nations"
and "International Law" back again to the initial inspiration of "Divine

tempo of the series, both in character and in color symbolism. It shows a huge page in what might be some ancient illuminated scroll, with cherubim and seraphim about the interlocked letters L-A-W. Red is for divine love and blue for wisdom, symbolic of the L and the W, the beginning and end of the word law.

Each panel is similarly treated, the subject appearing above an illuminated inscription from the writings or sayings of some great law-

giver of the world's history. After the opening panel, Divine comes the vision of the Golden Age, followed by three panels dealing with "Revealed Law," and tracing the legal conception first as John Sloan's Works the prerogative of Deity, with the worldly king the judge but not the law-giver; second as law revealed by God directly to Moses, a flery law; third as the quiet teaching of Christ in the Sermon on the Mount. Many of the figures appearing in the third panel of the "Revealed Law" group have been studied from Arabs found by Miss Oakley in the

same life as in Biblical times.

A more definite historical treatment of episodes begins with the first panel in the group playing about the note of the "Law of Reason." Here his building, dedicating to the service the Roman Law. The text below the picture contains a quotation from Dante on Justinian, and another from Blackstone, thus introducing that great lawmaker who appears as the central figure in a triple panel dealing with the "Common Law."

The figure of Blackstone is inspired All Souls' College, Oxford, and the library itself is used as background.

background from the Supreme Court at Philadelphia, and a similar eulogy of John Marshall with the environment of Washington.

With the International Court at The Hague and the destruction of naval armaments as panels typifying the era of International Law, the story passes once more to the high level of Divine Law and merges with the

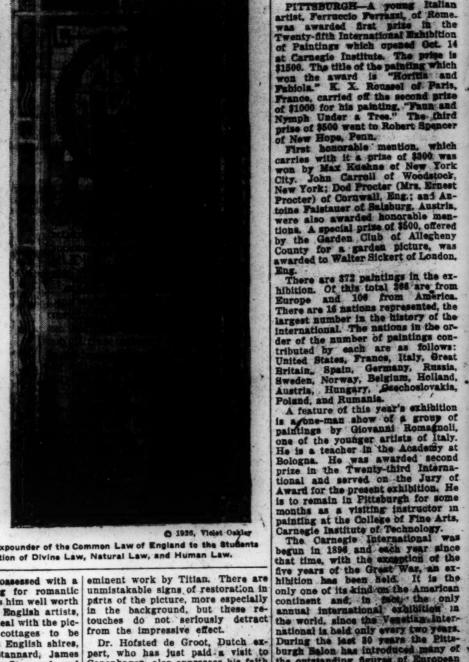

opening panel. So inseparable are the literary and artistic conceptions of the work, so highly symbolic the design that to appreciate the series to the fullest one must read the text while viewing

Two passages are especially well chosen. One in connection with equity in Pennsylavania is based on a quotation from Lloyd's "Early Courts of Pennsylvania," and stresses the likeness of law to music.

It reads: Some reformation of our procedure belongs to the future. Of that we may be certain. It is impossible to imagine that our technical and complicated practice will not fall some day of its own weight and be replaced by a procedure clearer, simpler and more scientific. In that simpler and more scientific. In that Golden Age when the practice of law will be a pleasant diversion, and the bringing of a suit the opening bar of a symphony, if one of our learned profession now living is permitted as a shade to revisit the scene of his earthly struggles, he will be able, perhaps, to recognize traces of Equity Procedure, but the Common Law actions will belong as completely to the past as himself."

But the practice and meaning of law as the world is beginning to understand it, are noticed in the pas-

"CRAIG'S WIFE" With CHRYSTAL HERNE Author of "The Show-Of" and Torch Bearers"

from the impressive effect.

Dr. Hofsted de Groot, Dutch expert, who has just paid a visit to Copenhagen, also expresses his faith in the newly acquired Titian which he describes as "a glorious picture."

The Danish State Art Gallery is now able to show three works by Titian, one being a portrait dating from the artist's younger years, when he was still much influenced by Giorgione, lent by the Glyptothek of Copenhagen, and another portrait, also of an unknown msn. A large part of the price paid for the new Titian has been contributed by the Carlsberg Fund.

Inational is held only every two years. During the last 30 years the Pittsburgh Balon has introduced many of the cuttainding figures of European art to America.

The exhibition will continue through Dec. 6. Immediatally, thereafter a group of approximately 150 of the European paintings will be shown at the Cleveland Russeum of Art, Jan. 4 through Feb. 14, 1927, and at the Art Institute of Chicago, from March 7 to April 18. Under the terms of Andrew Carnegie's gift of the institute to the City of Pittsburgh, the exhibition will be "free to the Carlsberg Fund.

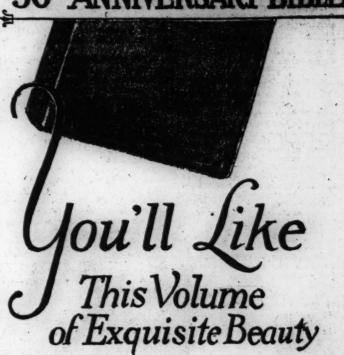

Prizes Awarded at Cornegie International

Nymph Under a Tree." The third prise of \$500 went to Robert Spencer of New Hope, Penn.

First honorable mention, which carries with it a prize of \$300 was won by Max Kuehne of New York City. John Carrell of Woodstock, New York; Dod Procter (Mrs. Ernest Procter) of Cornwall, Eng.; and Antoine Faistaner of Salaburg, Austria, were also awarded honorable mentions. A special prize of \$500, offered by the Garden Club of Allegheny County for a garden picture, was awarded to Walter Sickert of London, Eng.

50"ANNIVERSARY BIBLE

Here is a splendid opportunity to get a really handsome edition of the Bible. Thousands have expressed their liking for it by purchasing copies. We are confident that you, too, will be thrilled with its beauty.

This edition is offered especially to readers of The Christian Science Monitor. It is the companion Anniversary Bible which we first announced last year and is being continued to supply an insistent demand. Companion in size —43/4x61/2—and in binding—Maroon Leather (French Morocco). It is printed in large, clear, easy-to-read type on India paper with gilt edges. Light in weight, it is just the Bible for convenient handling and reading.

Orders for five or more will be filled at the special price of \$4.90 a copy, delivery charges prepoid by us. If thumb index edition is desired, add 50 cents per book. Special terms on larger quantities.

AS A GIFT

Many are buying this Bible for gifts. You may want to do likewise. We stamp the recipient's name in gold on the front cover for 50

TUST where the line is crossed might, perhaps, convey a picture of between poetry and prose has that unique manifestation—for every never been finally explained, sunset is unique and individual: it is never repeated in exactly the same

> Whether we in our day are gain ing a clearer understanding of poetic values or not, it seems that we are faced with a situation somewhat paradoxical; the dividing line beUsing this plotted guidance for our tween poetry and prose is lower in the literary scale, but we must make he new standards more selective. It has been said that pure prose

directories. Yet even the time of arrival of a train at the Grand Central may be associated with an event which will provoke dithyrambic outpourings. And Main 5678, though nothing more than unadulterated prose on the page of the telephone directory, might be the key to unlock experiences and joys which would find expression in sonnets and lyrics. But "Main 5678" will not serve for a trumpet call, nor can it very well be set to music. It is, therefore, purely prose. The recital of a fact, using Many examples might be quoted that fact—that is, narrating what the show how the tables have been that fact—that is, narrating what the show how the tables have been happened, just as it happened—is to across the vernal carpets with an with charity for all"; this we speak fill the rôle of the prosateur. The of as one of the finest examples of prosaist is prefatory, redundant, and

Generation:

The going out to fetch the little calf

That's standing by the mother. It's word-shack he builds. Occasionally he succeeds in writing a perfect news paragraph—that is, one in which not a single shred of poetry finds its way. He remembers every word, and forgets all the music, he drowns imagination in facts, and case only imagination in facts, and sees only stone in the Washington Monument. He explains the pencil and the pigments instead of silently displaying the picture. He says of a summer's day, "It is hot," and of December wind, "It is cold."

that facts and art move on different planes, seeks to fathom the idea at the back of the manifestation: to discover the vital image, and to compress into one concentrated word-picture a thought that stings or startles the reader into acquiescent delight. This gift belongs not alone to the learned and the cultured, nor

to the learned and the cultured, nor to the simple and unsophisticated. The wind-tanned farmer who, when commenting on the cold of a winter's day, says, "It's as sharp as a brier," is a potential poet, for in using colorful words he makes us feel the tang of clear cold winds, and the sting of the words produces an involuntary shiver. The Negro cotton-picker who refers to a sum-

words of silver. The essential re-quirement of poetry is that it be direct and sincere; and of the poet, that he be free. It may be that it is just at this point that we can draw a line between poetry and prose. The prosaist sails a charted sea; he is lashed to the mast of matters-of-past, and even this new-found song fact; he looks up into the rigging of which he sails, he describes every n, he tells us of her cargo, and how many knots an hour she makes. Such men often are writers of textbooks and learned treatises,

low the trade winds, he is in the wind. Aeroplaning in the firmament of imagination and touched by fire of inspiration, he may see the ship as a scudding cloud that lightly dropped from sky to sea. From his altitude he sees the essential unity of things; bille ring canvas becomes, to him, white wings speeding toward a desired haven. And because he is a poet he must tell us these things. poet, and of poetry: the poet must make us see just what he sees. When

moon is in the treetops! And the stars? Why, they're dancing in the

But this also is true:-if we recognize the song of the poet we, too, are poets. A. J. P.

Character

By imperceptible degrees, he had become known among the people. Now, as heretofore, he labored for his bread, and was the same simplehearted man that he had always been. But he had thought and felt so much, he had given so many of the best hours of his life to un-worldly hopes for some great good to mankind, that it seemed as though he had been talking with angels, and had imbibed a portion of their wisdom unawares. It was visible in the calm and well-considered beneficence of his daily life, the quiet stream of which had made a wide green margin all along its course. Not a day passed by, that the world was not better because this man, humble as he was, had lived. He

THE CHILDREN'S PA

Little Cat

By RALPH BERGENGREN

HE hall clock in the house, I've watched it once, and I never where Little Cat lived struck twelve times, and Little Cat, who had been asleep all curled up in his basket behind the kitchen the company of stove, uncurled himself in his basket, and ket, and sat up in his basket, and wet his paws with his tongue, and washed his face, and straightened his white whickers.

This basket behind the kinded by those words don't seem to mean anything at all. What a cat you are! What a cat you are!"

"I think hard all the time," said Little Cat, "and that keeps me bright.

What fun!"

And so Little Cat jumped out of his basket, and got his cane and his latchkey, and let himself out through the front door, and closed the door after him, and walked down the gravel seth on his hind legs.

They won't like it," said Dog Wow.

"We must wake them up," said Little Cat.

"They won't like it," said Dog Wow the gravel path on his hind legs like a little gentleman, swinging his cane with one paw and twirling his long white mustaches with the other. "They don't know I've got a latch-key," said Little Cat to himself, "and they wouldn't believe I could use it if I had one. Lots they know about Dog Wow. "We must wake them up. me, and what I can do when they're Will you begin, Little Car? all sound asleep! But there are not many cats like me, and that's a fact.
What a night! What a round, silvery began to sing as loud as he could.

Dog Wow Approaches

It was indeed a fine night. The moon was almost full so that the houses and vards and the trees and asleep. Little Cat walked in the middle of the sidewalk, and when he had said Little Cat, "Bark."
So Dog Wow stood up, and opened where Dog Wow lived, who should his mouth, and barked and barked he see coming out of the gate but Dog Wow himself. Dog Wow was walking on his hind legs like another gentleman, with his front paws where his pockets would have been if he had worn trousers. But been if he had worn trousers. But standing on his hind legs made Dog "Sor Wow so tall that when he saw Little Cat he came down on all fours so that they could talk more comfort-

"Good evening, Little Cat," said Dog Wow, politely lifting his right paw to where his hat would have been if he had worn one. "Or perhaps I ought to say 'good morning.' Little Cat waved his cane. He was

pleased to see Dog Wow, who turned round, and they went along the reet together.
"The hall clock struck 12 just before I came out," said Little Cat, "so I suppose 'good morning' is really

the right thing to say."
"If it had struck one," said Wow, "you might have seen the mouse. Of course you remember the poem:

Dickery, dickery, dock!
The mouse ran up the clock.
The clock struck one
And down he run,
Dickery, dickery, dock!

"I remember it well," said Little Cat, "but I don't think much of that

washed his face, and straightened his white whiskers.

"They think I'm going to stay asleep all night in my basket," said Little Cat to himself, "but that's where they fool themselves. I've had a good cat nap, and now I'm going out to take a walk and enjoy the beauties of nature. What fun!"

Little Cat, "and that keeps me bright. I just think about everything. For example," said Little Cat, pointing with his cane through a gate they were just passing, "when I see the Tompkinses' front door left wide open like that, I can't help thinking that somebody has been very careless, and that the Tompkinses ought below a shout it."

"We must wake them up," said

"They won't like it," said Dog Wow "People don't like to be waked up after they have gone to sleep for the

night."
"If they don't wake up," said Little Cat, "the door will be open all night.
I'm sure they wouldn't like that."

He sang and he sang and he sang first one cat song and then another cat song and then another cat song until he had sung all the cat songs he knew. But nobody in the Tomphouses and yards and the trees and kinses' house paid any attention the street were all bathed in a sil- whatever, and after a time Little Cat very light. But the houses were all stopped singing, and looked down a dark inside, and the people were all Dog Wow, who was sitting on the

"I guess it's your turn, Dog Wow,

And somebody dressed all in white came and looked out of one of the upstairs windows in the Tompkinses' house. But nothing else hap

"Somebody is awake," said Dos Wow, "I saw somebody at a window,

said Little Cat. "I guess whoever it was has gone back to bed," said Dog Wow. "Try it again, Little Cat."

Songs in the Night

So Little Cat sang again all the cat songs he knew, but nobody in the Tompkinses' house paid any attention whatever. And then Dog Wow barked every kind of a bark he knew, but nobody in the Tompkinses' house paid any attention whatever, said Dog Wow. "I only chase you in

as ever. And after a time Dog Wow stopped barking because he had said Little Cat. "But we will go into the house, and then I will sing, and "This is the most discouraging thing I ever tried to do, Little Cat," panted Dog Wow. "Anybody would think they didn't hear us at all."

"They can't help hadring the stairs, and through the hall, and down the stairs, and out through the door. And if somebody doesn't get up then and find the door open.

Cat, "but I don't think much of that poem. It's a poor sort of poem because it ought to be 'ran,' not 'run.' And it's an untruthful poem because obstinate when they do that. But we across the lawn and into the door open, why, we'll have done our best, and that's all we can do."

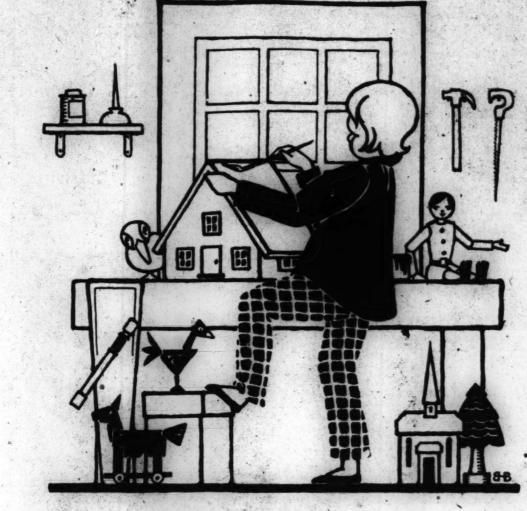

So Little Cat and Dog Wow trotted across the lawn and into the Tompmothing of the sort happened. Mice will get them up yet. You must don't run up clocks. I've sat and watched that old clock 20 times if "But I don't chase you at night,"

across the lawn and into the following shrilly kiness' house. And when they got in the hall Little Cat sang one of his loudest cat songs, and Dog Wow thinks.

> "They're awake at last," said Little Cat. "Everybody in the family is wake, and they're all coming downstairs together, Mr. Tompkins and Mrs. Tompkins and the little Tomp kinses and the cook and the maid

"They ought to be grateful to us,

said Dog Wow, as they hurried away across the lawn, "when they find somebody left the door open."
"They ought to be," said Little Cat.
"But people don't know much about us. They think I'm asleep in my house, and here we are out enjoying F. C. R. the Tompkinses that they had for-

When each player has secured his place the Clock Tower calls "Time!"
The players then rush off and collect as many leaves, sticks, or stones as the number on which they stood. If they can get back to their places with them before the Tower counts "Sixty!" again, each scores the full amount of his number. If he fails he scores nothing for that round of the game.

If "Number One" is not back when the leader calls his "Sixty!" he must change places with him and be the Clock Tower for the next turn.

The player who first scores 60 wins the game.

Sticky Fingers

* Written for The Christian Science Monitor Sometimes my mother gives me honey At tea-time for a treat, And then I try with all my might, To keep both clean and nest:

ONG, long ago, in Devonshire, companied by her ladies-in-waiting, and the whole crowd stood still and admired the splendid sight.

Suddenly she paused, for she had come to a very muddy puddle. But almost before the Queen had time to think. Sir Waiter Raleigh had stepped out, and swinging the crimson cloak from his shoulders, he laid it over the muddy path. For a second Queen Elizabeth hesitated, and then she smiled and walked daintily over the cloak. Then she relating for a life of adventure.

Waiter Raleigh studied at Oxford until he was 13, and then he went to France to help the French Huguenots. He stayed there five years, and when he returned to England he was a very skillful soldier.

To keep both clean and nest:

ONG, long ago, in Devonshire, and the whole crowd stood still and admired the splendid sight.

Suddenly she paused, for she had come to a very muddy puddle. But almost before the Queen had time to think. Sir Waiter Raleigh had stepped out, and swinging the crimson cloak from his shoulders, he laid it over the muddy path. For a second Queen Elizabeth hesitated, and then she smiled and walked daintily over the cloak. Then she beckoned to Sir Waiter Raleigh and asked to pay for the cloak. Aug. 25, 1925:

Pronunciation

curity question-of course one

T THE present moment the two languages from which trans-lations into Japanese are most nsiderably made are Russian and French. Contrary to the natural presumption, comparatively little translating from English is being—or, indeed, has been—done in Japan. "The explanation of this," says Y. Hirota in the Japan Advertiser, "is simple and understandable. On account of the widespread knowledge of English, and to a less extent of German, in Japan, original sources are nearly ways resorted to by lovers of Engish and German literature, and so the need for translation is mini-

Of course nothing could better strate the extent to which the nglish language is known in Japan today than the statement that there is little need to translate from it in

little need to translate from it in order to meet the requirements of educated Japanese. It is worth noting, too, at this point, that Mr. Higota puts German as a close second to English, in this connection.

The commercial language of Russia has been German. That is to say, almost every Russian banker, business man or public official who knew any other language but his own—and they all did—knew German. He might know French, he man. He might know French, he might know English; but these were possibilities, whereas Germany was a certainty. Putting the case differently, the most useful language, other than Russian, that a man could know when I was in Russia

(in 1917-18), was German.
Let us look this Russian situation squarely in the face. Up to the present time, an education has practically been denied to the Russian peasant. But henceforth a change is certain. These Russians will ultimately know how to read and write mately know how to read and write their own language as they gradually emerge from present illiteracy. But some other language should be yes, will be taught in their schools. What shall that other language be? And the same query is equilly pertinent with respect to every other nation on the globe with which English-speaking nations are henceforth to maintain business or social relations.

Need in Statesm Think how the lack of a common language embarrassed the men who sat around the Warld's Council table in Paris, after the war men of exceptional education, be it noted. Under date of Jan. 17, 1919, Paul Scott Mowrer cabled from Paris to the Chicago Dally News as follows:

With the aid of one interpreter, each delegate has so far used the language of his own choice. This interpreter is a French officer. Several of the delegates have used two

Premier Clemenceau addressed President Wilson in English and then turned to explain in French the drift of his argument to M. Pichon and M. Klotz.

Foreign Minister Balfour, with eady facility, made several short peeches in French, and finished with an English translation of his way declarations.

Baron Sonnino spoke both in rench and in English, and then hispered a translation in Italian to remier Orlando.

President Wilson, Premier Lloyd

George and Secretary Lansing made use only of English.

Imagine men engaged in the most realm of adult education.

The keynote of the organization of continuation and adult classes in hampered—trying to get on "with the aid of one interpreter," and with English, French and Italian flying in alternate gusts across the table. One there were classes last winter in 90 might smile, were it not so vitally centers. They were of widely vary-serious. What a lightening of bur-dens—what a contribution to ease quire what teacher was available,

in this country-dated Washington, ment between the United States and France. I find the following, which carries with it its own most unfor-tunate moral:

The press reports of the Peace Conference in Paris have given an impression of constant conflict be-tween the French and American delegations. Unfortunately it is true that the American delegation, as well as most of the American corre-spondents, because of their inability to talk the French language, have not fully understood the French point of view.

Need in International Finance

In July, 1922, at the time when a highly important international financial conference was in progress in was a participant—the special corin that city cabled to that paper the following statement as officially coming from Mr. Morgan:

Early in the discussions of the committee it became apparent that there was a difference between the English and French texts of the reference from the Reparation Commission to the bankers' committee. This difference touched the very root of the matter, in that the French reading definitely methods. ing definitely prohibited the commit-tee from giving consideration to the schedule of payments as now de-termined, thus preventing any practical recommendations as to the basis upon which a loan to a potentially solvent Germany could be devised. The English text, on the other hand, was susceptible of a broader inter-

tives of perhaps the most powerful banking interests in the world, gathvided with a hall, a piano, a wireless set, a gramophone, a lantern and sheet, a stage, and a branch of a great tibrary. The need for this activity is undoubted. Mr. Brown says that he has talked to farm youths who spend the evening—every holds in the way of effecting that at "the very root of the matter" lay a difference between the English and French texts.

These texts were undoubtedly

vided with a hall, a piano, a wireless set, a gramophone, a lantern and sheet, a stage, and a branch of a stage, and a branch of a branch of a branch of a stage, and a branch of a branch of a stage, and a branch of a branch of a stage, and a branch of a branch of a stage, and a branch of a branch of a stage, and a branch of a branch of a branch of a stage, and a branch of a branch of a stage, and a branch of a branch of a stage, and a branch of a branch of a stage, and a branch of a branch of a branch of a branch of a stage, and a branch of a stage, and a branch of a

rajoinder on the security question, official circles here are advised.

The Foreign Minister's knowledge of the French language, while sound and extensive, is said not to be sufficient to solve all the intricactes of French diplomatic style, in which delicate shades of language might be variously interpreted.

Dr. Stresemann expressed nimself as satisfied with the French original, but when the German translation was submitted to him by his assistants he decided that some of the points needed further elucidation verbally from the French Ambassador. Consequently he invited him to call at the Wilhelmstrasse this sador. Consequently he invited him to call at the Wilhelmstrasse this

Extended comment on this is not understanding. How greatly the situation would have been clarified had there been in use one standardized don't send my child to school to learn language, intimately known to both falderols. He can learn those at German and the French representatives and their associates!

Need Indisputable The facts above cited could be ligation do about this?

I advocate the immediate appointment by our own Govern of a small commission, with which the co-operation of all other gov-ernments shall be requested. These assemble as soon as possible at some designated city and there de-cide upon the language to be chosen for international use and to schools, parents can provide for be taught in all schools of all counthem the joy and help of artistic extries, side by side with the national language, whatever that may be. It will cost little or nothing. It will involve no elaborate special mechanism, but will harmonise quickly and easily with all existing national systems of public school in-struction. In a word, it will simply be abandoning present haphasard methods and substituting for them a systematic and unanimous plan of international action.

be involved in accomplishing results after putting this plan into execu-tion? Five years will do much: Ten tion? Five years will do much: Ten
years will show vast progress. Another five or ten years thereafter
'will bring substantially rull fruition.
Let America, England, France,
Germany, Italy and indeed all other
nations join hands in this movement for an international "second"
language therefore without delay language, therefore, without delay Let us begin, forthwith—in the interests of universal peace and prosatwixt men's hearts."

What is the time that is likely to

These people realize that through the use of art as a medium, a child can express his thoughts and feelings, and in this expression can grow mother knows this, and she does no ings, and in this expression can grow required, of course. "Sound and extensive" as undoubtedly was the German Foreign Minister's knowledge of French, for ordinary uses, the nevertheless of the course of the nevertheless of the course of the nevertheless of the course of the co he nevertheless felt it unwise to expressed this love in the same arts trust wholly to it in so important the child is learning to use. Leisure an emergency, and therefore had re-hours for refreshment in later years course to a personal conversation are no problem, but a real joy and with the French Ambassador, in or-help to those whose child-thought der to avoid probable serious mis-has been lifted by this contact with

home." "And what are the falderols?" he was asked. The expected reply was that he was referring to instru tion in music, painting, dramatics The facts above cited could be multiplied many times. They are indisputable—they are but too plain. Now the question is: What will civision prevents gratitude that the isation do about this? child the joy of growing through the

The more progressive schools have realized the big part the arts play international delegates should then in aiding the child's growth and are equipped to care for it. But even before the little ones enter these pression. All we need to do is to supply the materials, surround the child with beauty, and quietly and partiently await the wonders that will evolve. If the child's art forms are our homes. Inexpensive prints of to be creative and not imitative, give him paints, crayons, charcoal, large sheets of paper, brushes, clay, plasticene, turn on music, and be an auditative in the children's rooms, these should also be selected with great cene, turn on music, and be an audience for his stories and songs. The parent's rôle is to supply the inspiration and appreciation. Just showing a child you have confidence that he can do something does much to release his talents. A child is just as easily discouraged, however; if he sees we do not value his work he may sees we do not value his work he may should also be selected with great care. A good idea is to have the frames made with removable backs, so that the pictures can be changed occasionally, as we are apt to take little notice of what we become accustomed to. Very little children are attracted by colored pictures, and they like best pictures of children

TODAY a great many people are lose interest in it also. It is a great incentive to him when we treasure the little lumps of clay he brings to

of it on paper. And it does not worry them if this representation it is far better to say, "Show me See for Himself

It is very helpful for a child to be able to look at his drawings or paintings for a few days. He thus sometimes is able to see his own mistakes. For this purpose the parent who wishes to be wisely helpful can find for the child an old screen upon which to pin the papers or can help him string up a cord, to which they can be clipped.

Still another function in the child's art education falls to the parent, and that is to make the child's home surroundings as beautiful and harmonious as possible, in order to cultivate good taste. Sing the lovely youngsters, and put records of this will know there is other music be and other lovely rhythmical music, and allow the little ones to dance, uninstructed. Then they will almost

Since the organization of the association for such a purpose in 1923, yearly non-competitive contests for excellence have been held. The first year there were 3000 contestants; this year there were 10,000 of all classes, races, nationalities, and creeds who were able to be heard, and their efforts for achievement ariticlesd." The association has a definite pol-

icy of contests without competition. Such contests have met a response greater than competitive contests are able to get. Playing up to standards. not as personal rivals, developing in-tegrity of purpose and sincerity in endeavor, gives strength to moral fiber for higher achievements. It tunes out jealousy, envy, hate, re-sentment, in the desire to bring out the best in music, the universal language. Contests so motivated are sure to benefit all who enter into them. They are sure to bring about a welding together of all citizens in the one purpose to appreciate, pro-duce, and enjoy music of the best kind whether in the home, concert hall, school, or church; to recognize talent wherever found, and to aid in its expression. The Works Inception

The story of the inception of the

work is interesting. Miss Lowden had studied music, dramatic art and reading; she had maintained a studio to carry on her work and had done ne newspaper writing as a musi critic. In the spring of 1917 she offered her services to the Red Cross and was put to teach classes of public speakers. It was not long before she was removed from the classroom to become director of the bureau headquarters. In this position, she came into contact with all nationalities, especially soldiers who were sent out to tell their stories. They came under her supervision, for it was her work to help them tell their stories.

One day there came a boy with a fiddle. He could play, but he could not make a speech or be taught to make a speech. She told him to take his fiddle and play his message. He did. All who heard him understood, and then the thought came to Miss Lowden, "Music is the answer!"

The incorporation of the associa-tion in 1923 was the next step. Then came the problem of reaching the people. Taking advantage of the division of the city into school districts, the association adopted the known ndaries of the 48 school districts in the five boroughs of Greater New York and appointed a chairman for each. A syllabus was made and presented to those who desired to take

ing. From the syllabus can be made a choice of selection to be played or sung by individual or ensemble groups. Registration fees are \$1 and

THE motive of the work of the New York music week association is to prove music a great force for universal peace. There has been "much talk of community singing bringing the people together," said Miss Isabel Lowden, director of the association. "But it was not through great choruses nor industry that music was to touch the hearts of individuals. It must come by individuals are swarded a bronuse medal; those reaching the first or district standard are awarded a bronuse medal; those reaching the second, or borough standard are awarded a silver medal, and those attaining to the third, the interborough standard ard, are given a gold medal. Engreter."

Non-professional While the public school districts are used to establish the units for work, the work is by no means confined to public schools or to children, but is confined to non-professionals. There are orchestras, brass bands, chamber music societies, glee clubs, private and parochial school choruses, church choirs, trios, quartets; in fact any person inter-ested in music is eligible who can meet the requirements indicated on the the application and is able to

The rapid growth has exceeded all expectations. Such expansion is enough to tax the resources of a well established organization and to overtax one so young as this. Yet, this year when the test came as to its value to the participants and their friends, the response to the call for support was evidence of the need to

This year there were 160 sessions of contests demanding the services of judges for three hours at a time. This work, done by some of the ablest men and women in the music profession was volunteered gladly though they have always been paid for it heretofore, and surely will be paid for it hereafter. The co-opera-tion of music teachers is splendid and is increasing, especially as it is realised that judges are forbidden to suggest a change of teacher. One sory that his pupils enter the con-

\$50,000 annually. Having passed the experimental stage, in the light of its requirements, the associati being reorganized to be better fitted ginning of its activities, the music week association has been supported by private subscriptions from publicspirited persons; for the season of effort to have the organization stand on its own feet, but the plans miscarried. Rather than disappoint the many eager children and demolish a growing organization giving joy and benefit to thousands, letters were written to all entered contestants, explaining the situation and asking the personal co-operation of each one. Another appeal was made to music teachers, numbers of whom have pupils in the contests, and a third appeal was made to parents of contestants. The responses carried through the contests.

Thus the great work of develop ing appreciation of good music in the individual and thereby in the compart in the contests, and the work munity, carried began. It met with immediate favor by the department of music of the Board of Education and was accepted musical instrument and many thousands of performers, can still go on.

The Leaven of a Countryside

Special Correspondence N THE county of Cumberland through the organizing, co-ordinating efforts of the director of education, G. B. Brown, a social and educational leaven has been work-

in the history of mankind being so Cumberland is, of necessity, flexibilhave resulted if these gentlemen had been able to have recourse to a lanbeen able to have recourse to a lanthe variety and also the value of the whole county, for the village this work. In a region of wild the whole county, for the village schools are too small to warrant and accuracy and progress-would and then build the class round him to be one of the ablest journalists apart, up a hilly road, with gates and water-splashes, the schoolmaster acts as father to a class of vari-April 2, 1919, in the course of a cussion of whether or not there had then taken place a change in sentiment between the United States and ment between the United States and which the course which who has walked 31/2 miles for the weekly meeting on arithmetic, is reoicing that he can now understand the class gathers together for some short common study or reading. In small mining village in an isolated, tarted a musical society. This became an operatic society, which, with

conderful success and enthusiasm, has produced cantatas and operettas at home and in the market town four miles away. Other Types of Classes Numerous other types of classes have been formed, and in places where nothing of the kind is yet pos-

sible the lecture club has proved effectual. A corps of voluntary lectures has been formed, the members of which go provided with lanterns and deliver lectures on various matters of local or other interest in calities otherwise unprovided with cultural opportunities. Closely associated with the work are the workers' educational asso-

courses. In these classes the numbers have risen in three years from 35 to 800. The rural library is also a great asset; and the women's institutes are proving helpful in the work of first stimulating and then satisfying the desire for education. A continuous expansion seems to be ahead for this new and vigorous cultural movement, which hopes to see every village in the county provided with a hall, a piano, a wireless

from a schoolmaster, said: "I have troublesome because made careful inquiries and so far I have 21 names for the earlier class and 24 for the later." Both these let-

ters came from the same village! Better Grouped The three small rural schools in the county are being grouped so that the senior children can be concentrated in a central school where their education can be progressively aim is to have a good equipment not only for these central schools, but for all schools. Those in control believe that "every rural school should have a practical subjects room of some kind—not a rigidly equipped, prison-like chamber, but a friendly, cheery, combination place, with its joiner's bench or two, its maps and pictures, its glue-pot and plasticene, its sewing machine, barometer, and a small mining village in an isolated, rough coalfield, two schoolmasters to provide three practical rooms—a started a musical society. This be-manual training room, a domestic science room, and a laboratory fitted according to a bigs indicated

had asked for

It would be so much more to every
mother's liking if each of us other
mothers, each of us who come in
contact with the children, would exwould not form in the average child. We mothers have often been much James Boycott, an Englishman who embarrassed when we have taken little Billy to call with us. The first James Boycott, an Englishman who was land agent for Lord Erne in the district of Connemara, Ire. Because he evicted tenants for the nonpayment of rent, Boycott incurred the hostility of the Irish Land League, which induced the population roundabout to have nothing to do with him or his family. Finally Boycott was obliged to leave the country.

So great was the peed in the language for a word to express just this idea, that "boycott" arose almost by popular acclaim in the fall of 1880. Not only in England, but in nearly every European country, the press seized upon the word "boycott" and incorporated it in the language. Thus there are forms of the word in French, Dutch, German of the course we don't mind. We contained the state of the st

when we talk it out with them under standingly.

Another thing we might do is to telephone to his mother and ask if plain to them the inadvisability of she knows where Sammie is. Or we asking for money. The children might send Sammie home to ask his would understand almost immediately: they are alert; and a habit our children for awhile. Those two methods are good ways also to learn other mothers' attitudes about their children spending so much time

ing indoors.

somewhere else besides home. All of us mothers have only kind and grateful thoughts for that dear lady who used to live next door. She always was lovely to our children. She always refused to give them cake when they asked for it, explaining her reason. She often sent them on errands and paid them small sums for the favor. But she did not allow them to ask for money, or sweets. Yet, the children loved her, and bragged about how she often

WHEAT PRICES UP

CHICAGO, Oct; 18 (AP)—Bigger price advances at Liverpoot than expected brought about an early upturn today in wheat values here. Action of the Liverpool market was ascribed to scantiness of stocks of breadstuffs abroad and to falling off in world exports because of coal shippers bidding vessel rates up.

Starting % to 1% higher, Chicago wheat prices continued strong. Corn and oats were firmer, corn opening at % to ½ gain, but subsequently reacting somewhat. Provisions tended downward.

Opening prices today were: Wheat, December .142%. May 1.46; corn, December .7616; May .81½; oats, December .44, May .48%.

OREGON VETERANS' AID BONDS NEW HAVEN. Oct 18—A syndicate company. Eldredge & Co., Kissel, Kinnicutt & Co., Anglo-London-Paris Company, Ralph Schneelock Company and Wells Dickey. Company, has purchased \$2,000,000 State of Oregon veterans' aid bonds, \$1,775,000 as 4½s and \$225,000 at 4½s, on bid of par plus premium of \$10.

NEW HAVEN. Oct 18—Kopper's Company of Pittsburgh has purchased 63 acres of shore front land near Fort Hale Park as a site for a coke plant to be erected in connection with its development of gas and coke utility business in Connecticut.

STANDARD OILS

LEATHER MART IS ACTIVE, WITH PRICES STRONG

Secondary Splits Demand Improving
There is an improving demand for splits. Prices are barely firm. Flexible splits are moving very well, the better grades selling at 17@20c. The lower sorts, all weights, are bringing 10@16c.

Stocks of flexible split offal are so low that they have not been offered for several weeks. Chrome calf skin and leather splits are in good request, the better selections selling at 12@15c. A cheaper sort is quoted at 8@10c.

Patent leather is having a regular run of business. Now that shiny leather is being decorated with printed designs of many colors, there will be no dull days for the Jappaners from now on. The fancy colors are priced from 55@75c. Then there are others quoted at 50@60c.

Top selections of chrome sides are listed at 18@40c, mediums at 34@36c, and a prime third grade at 28@30c, with cheaper leather quoted at 20@24c.

Combination patent sides of the better selections are 24@26c. A medium grade sells at 20@22c, with cheaper lots available at 14@18c.

Glasse kid tanners report new business very good. Standard grades of black kid are actives. The choicer sort is quoted at 55@76c, measuring from four to five feet. Choice seconds are 55@56c.

However, it is stock ranging in price from 18@22c, with a grade listed at 23@35c, that is seen in most of the sales. The cheaper sort is kept well sold up, and seldom reaches the surplus stage.

UNION TANK CAR COMPANY Notice of Redemption of Preferred Stock

TO THE HOLDERS OF THE PREFERRED STOCK: NOTICE IS HEREBY GIVEN that at a meeting of the Board of Directors of UNION TANK CAR COMPANY, a corporation of the State of New Jersey, duly held on the first day of October, 1926, the option to redeem all of the outstanding preferred stock of UNION TANK CAR COMPANY was by resolution duly exercised, said redemption to take place on December 1, 1926, at the principal office of THE CHASE NATIONAL BANK OF THE CITY OF NEW YORK, at NO. 57 BROADWAY, NEW YORK, N. Y.1 and that the redemption price of said preferred stock is One Hundred and Fifteen Dollars (\$115) per share, with accrued dividends to the date set for redemption.

From and after December 1, 1926, dividends will cease to accrue upon said preferred stock and no right, title or interest in or to the said stock shall pass by any subsequent assignment or delivery of the certificates therefor, and the said certificates shall thereafter carry only the right upon presentation thereof to payment from the fund set aside for redemption.

The stock certificate, properly endorsed and witnessed, (with signature to any assignment guaranteed by a New York Stock Exchange firm or a bank or trust company with a New York correspondent) should be sent to The Chase National Bank of the City of New York, No. 57 Broadway, New York, N. Y. If payment to the holder of record is desired there should be inserted in the space provided for filling in the names of assignees, the words "for redemption," and the space for the names of the attorneys should be left blank. All transfers of record should be completed not later than November 30, 1926. The signatures upon the endorsements or instruments of transfer must tures upon the endorsements or instruments of transfer must correspond with the names as written upon the face of the certificates in every particular, without alteration or enlargement or any change whatever. In cases where holders of certificates of stock are administrators, executors, trustees, guardians or agents, proper evidence of authority must be furnished. No transfer stamps need be affixed or supplied.

BY ORDER OF THE BOARD OF DIRECTORS

Dated, October 16, 1926.

SECOND RACE IS DECLARED VOID

Bluenose Again Finishes Ahead of the Haligonian

HALIFAX, N. S., Oct. 18 (4)—The second race for the Canadian fishermen's championship was declared void today because the Bluenose, which crossed the line ahead of the Haligonlan, did not finish within the time limit set, 2 o'clock (Atlantic time). A third race will have to be sailed.

The Bluenose and the Haligonian raced today under a breeze averaging 20 knots and with a moderate swell, but the wind hauled to north as the vessels approached the mouth of the harbor. When the time limit of five irs expired the Bluenose was minutes from the finish line.

Bluenose got the better of the start.
Capt. Meric Crouse of the Haligonian,

beat the gun in Saturday's race did not take any chances today and allowed the Bluenose to take the weather berth. Crouse jibed for his run to the line and Haligonian crossed

"with a bone in her teeth."

The wind was blowing 20 knots from the northwest at the start, but dropped as the vessels proceeded down

that sailed Saturday.

terms with the Bluenose shortly after the start; but the Bluenose later ran away from the Haligonian as the inner automatic buoy was neared, and passed it, the official time at the buoy

The Bluenose continued to increase its lead in a moderate sea and drew away from the challenger, as Sambro Lightship, second mark, was sighted. At 10:45:05, official time, the Bluenose jibed around the Sambro Lightship and set its course for the southeast automatics. The Haligonian fol-

wed at 10:50:40. The wind hauled to north as the schooners proceeded on the third leg.
At 11:28:40, the Bluenose rounded the
southeast automatic and stood on the starboard tack for the thresh to windward to the finish line. The gonian rounded it at 11:37:25.

Pro Tennis Draws Many Spectators

Professional tennis matches made their initial appearance in Boston Saturday when Mile. Suzanne Lenglen, the famous French woman who has held the championship of the world for some years, Paul Feret, also of France; Vincent Richards, Howard O. Kinsey, Harvey B. Snodgrass and Miss Mary K. Browne, all of the United States, played a series of exhibition matches at the Boston Arena before a thering of some 9000 spectators.

The feature matches were the ones
which Mile. Lenglen played and

she gave the spectators a chance t nee some fine tennis. In her singles match against Miss Browne she won match against Miss Browne she won with ease, playing from the baseline most of the time and keeping Miss Browne on the run. The score was 6-2, 6-1. In doubles Mile. Lenglen paired with Paul Feret, fourth rank-

-2. In men's doubles Richards and Kinsey defeated Snodgrass and Feret in a hard-fought match, 6-4, 7-5.

BRITISH FOOTBALL

LONDON, Oct. 18 (P)—Soccer foot-ball games played in Great Britain Saturday resulted as follows:

Arsenal 2, West Ham United 2; Birmingham 1, Derby County 0; Burnley 5, Blackburn Rovers 1; Manchester United 3, Bury 0; Newcastle United 3, Everton 1; Huddersfield Town 0, Cardiff City 0; Leicester City 3, Leeds United 2; The Wednesday 3, Liverpool 2; Sunderland 1, Aston Villa 1; Tottenham Hotspurs 3, Sheffield United 1; West Bromwich Albion 1, Bolton Wanderers 1.

SECOND DIVISION Barnsley 2, Portvale 6; Wolverhampton Wanderers 3, Blackpool 2; Darlington 3, Bradford City 0; Pulham 2, South Shields 2; Hull City 1, Grimsby Town 0; Southampton 4, Marchester City 3; Nottingham Forest 4, Middleboro 3; Oldham Athletic 5, Preston North End 1; Chelsea 3, Portsmouth 2; Reading 7, Notis County 1; Swansea Town 3, Clapton Orient 2.

Ashington 2, Rochdale 2; Bradford 3, Lincoln City 1; Chesterfield 3, Tranmere Rovers 1; Crewe Alexandra 2, Doncaster Rovers 0; Nelson 1, Durham City 1; New Brighton 4, Southport 1; Halifaxtown 4, Rotherham United 2; Stoke City 4, Barrow 0; Walsalj 5, Accrington Stanley 1; Wiganboro 3, Hartlepools United 0; Wrexham 2, Stockport County 1.

Aberdeen 3, St. Johnstone 1; Motherwell 3, Airdrieonians 1; Clyde 2, Falkirk 1; Cowdenbeath 2, Dundee 1; Dunfermiline 2, Dundee United 0; Hibernians 1, Hamilton Academicals 0; Hearts 1, Patrick Thisties 0; Kilmarnock 2, Morton 0; Queens Park 1, Rangers 0; St. Mirren 3, Celtic 1.

RUTH'S HITTING HALTS GAME MONTREAL, Oct. 18 (P)—George H. Ruth stopped a good ball game here yesterday when, knocking 36 bails out of the grounds, he forced the game to be called shortly after the start of the ninth inning because the management had no more spheres. Ruth enjoyed a big day at bat, to the delight of 3000 fans, who saw a home-run hitter lead Guybourg to a 4-to-3 victory over Beaurivage. Ruth was accompanied by Urban U. Shooker, a New York teammate. Ruth's performance included two home runs. The majority of the balls were lost when he hit fouls. In addition to playing at shortstop and firs' base, Ruth pitched three innings and did not allow a run or hit. He also umpired for an inning. RUTH'S HITTING HALTS GAME

CHESS TOURNEY JULY 18 By Cable from Monitor Bureau
LONDON, Oct. 18—The annual meeting of the Council of British Chess Federations decided that an international team tournament and the annual Congress be held concurrently here, commencing July 18. Details of the Congress are to be determined after the entries for the international team tournament, which are due Jan. 1, are received. The Urban U. Shocker, a New York teamproposal to establish a benevolent fund in connection with the federations was confirmed.

Toronto Downs Queen's 11 to 5

Gains Its First Football Vic tory Over Rivals Since the 1922 Season

TORONTO, Ont., Oct. 18 (Special)— University of Toronto scored their first football victory over Queen's Uni-versity since the opening game of the 1922 season here on Saturday after-noon when they defeated the four times intercollegiate champions by 11 to 5, and on the play deserved an even greater margin of victory. It was also Toronto's first win on their home

also Toronto's first win on their home ground since 1923. It was the second reverse for Queen's in the Intercollegiate Union in five seasons.

The winners displayed an all-round superiority over the tri-color, and it was only in the first period that the losers were able to hold their own. Aided by a fumble on a line plunge Queen's secured the ball near the Toronto goal line and-Batstone scored a field goal. Before the period ended he field goal. Before the period ended he added two more points on rouges, but thereafter Queen's was not only held scoreless but held beyond scoring dis-tance, most of the play being in the loser's territory.

If it were not for the brilliant defen-

sive playing of Batstone the score would have been much larger, he caught faultlessly all afternoon and did practically all of the Queen's backthe harbor.

The course selected called for a run of 17 miles down the wind to the Litchfield automatic buoy, to Sambro Lightship; a reach of seven miles to southeast automatic and a dead beat of 13 miles to the finish line. The course is shorten by three miles than that sailed Saturday. Queen's line, and made four yards on the first plunge, permitting Stollery to The Haligonian came up on even go over for a touchdown. Later in the

game Snyder dropped a field goal and kicked for a single. Owing to a wind which assisted the team kicking morth, the game developed into an aerial contest with the uenose, 9:44:00; Haligonian, locals having the advantage. Trimble and Sinclair caught faultlessly and outkicked the Queen's backs. On the line Stollery and Carrick were the best with M. Snyder and Irwin holding the

with M. Snyder and Irwin holding the opposing runners in check. For Queen's Batstone, Monohan, Howard and Britton were the sars.

The results puts McGill at the top of the standing with a win and no losses, Toronto is second with a win and a loss and Queen's last with one loss. The summary:

UPSETS RECORDED AS TEAMS LEAVE THE UNDEFEATED CLASS

Dartmouth's Clean Record Since 1923 Marred by Defeat at Hands of Elis-Annapolis Team Proves Surprise When It Downs Princeton

teams engaging in such hard games as the schedules for the last week-end called for, it is not at all surprising that some of the leading teams in that section of the United States should valled in National Hockey League cir-cles for some time. Indications now are that, with the exception of a other, the only result that can prewhen undefeated teams meet each few possible little differences the pro-fessional league will find smooth sail-ing during its first season as a 10the present style of playing. Saturday Nearly all of the time was taken saw every game of moment decided in Nearly all of the time was taken up in discussing and settling the cases regarding players who were members of the clubs in the defunct Western Hockey League last winter and the ownership of a dozen or more players was determined.

The Cook brothers, William and Fred, were awarded to the New York Rangers and the club will reimburse the Seskaton Club of the former Western with the case of the contending teams. The Yale-Dartmouth contest attracted the most interest in the east as the latter team had not been defeated since 1923 and, while it had never secured a victory over the Elis, went to New Haven this fall expecting to keep its slate clean. Yale, however, added another victory to its long list year. Yale also uncovered a player

Princeton Loses to Navy Princeton was the second of the sobeen purchased by St. Patrick's. The player claims he is not under contract player claims he is not under contract to Saskatoon and if the latter club can eleven and West Point is going to have some serious opposition when these two service teams meet at Chicago the last Saturday in November. The Midshipmen's forwards outplayed the Orange and Black and three touchdowns and two field goals gave Navy their score. The Tigers played hard football in the second quarter and made all of their points then, largely through fine forward passing work by E. E. Baruch and P. H. Strubing 2d both members of the sophomore class. Harvard secured its first victory of the season by defeating William and Mary 27 to 7. While the Crimson does not seem to have advanced as much since the Holy Cross game as it did between the Geneva and Holy Cross

ineligible for the varsity in 1924 and

was expected to produce most of the excitement, proved to be a quiet disare working hard and rounding into are working hard and rounding into form for their more important games to come. Their protection against the forward pass was the best they have ever shown and indicates that they are beginning to master that type of play. Their own forward passing was also better than any they have pre-viously shown and in the latter part of the game they uncovered a for-ward-passer who should rank among the best before he graduates. He is David Guarnaccia '29. This back is also good at running with the ball. Penalties and, at times, loose handling

surprise by defeating Chicago by the big score of 27 to 0, while Columbia lost to Ohio State 32 to 7. The Red and Blue proved far too strong for the western eleven and promises to end its season in splendid tashion, Ohio State owes much of its showing to Fred H. Grimm '28 who went into The special committee appointed to take up the matter of affiliation of the minor leagues presented a report which was adopted and as a result the Central Hockey Association or American Professional League, the Canadian Professional League, the Prairie League and the Canadian-American League and the Canadian-American the Canadian the Cana

most spectacular game.

While the Navy was defeating Princeton, West Point showed that it is building up a strong eleven by defeating Syracuse 27 to 21. The Cadets made a splendid uphill battle of the game and won by playing much oldstyle football, its chief gaining plays being on off-tackle shoots and plunging through the center. They could gain little ground around the ends. The West Point line was very powerful and it will be interesting to see what it can do against the Yale forward of the season earlier. Even the most radical advocates of a long major-league season must admit that good weather conditions in a World Series are only fair to the players and what it can do against the Yale forward of the season exists and it has processed to the players and what it can do against the Yale forward of the season exists and when the results of the season earlier. Even the most radical advocates of a long major-league season must admit that good weather conditions in a World Series are only fair to the players and what it can do against the Yale forwhat it can do against the Yale forwards.

New York University gave an impressive exhibition when it defeated Tulane, one of the strong southern elevens, 21 to 0. The Violet line not only held firmly on the defensive, but opened up fine holes for the backs when on the attack. It is one of the strongest N. Y. U. elevens that has yet taken the field. taken the field.

Pittsburgh won but was forced to the limit by Colgate, the final score being 19 to 16. The game was in doubt to the very end, Colgate several times approaching the Panthers' goal line, only to be turned back. Line plunges and end runs, with a few forwards, gave the winners their points, while the losers depended largely on forward massing for their geals.

passing for their gains.

Lehigh, although defeated, showed much improvement, especially when on the defensive and held the strong Quantico Marines to a 13-to-6 score. Coach P. L. Wendell is evidently making progress and the showing last Saturday was better than any previous one this year.

"Little Three" Win Games Amherst, Williams and Wesleyan

Amherst, Williams and Wesleyan, the "Little Three" all won their games with Amherst, the champhons, having the narrowest margin. This team faced Ham'lton and the best it could do was 14 to 0. Williams met Massachusetts Agricultural College and won rather easily 20 to 0, while Wesleyan defeated Rochester 27 to 6.

Two of the four Maine State college elevens won and two lost; but the two that lost really made the best showing of the four. Bowdoir was defeated by Tufts as told above, while Bates lost to Brown 27 to 14, this defeated by Tutts as told above, while Bates lost to Brown 27 to 14, this score being a big surprise and showing considerable unlooked for strength on the part of the losers. University of Maine defeated Connecticut Agricultural College 21 to 0 while Colby just managed to defeat Lowell Textile School 5 to 3.

One of the peculiar features of Saturday's games was the outcome of the Phillips Andover and Phillips Exeter Academy games against the Yale and Harvard freshmen elevens.

With the eastern college football These are two strong preparatory men rivals and in each case the fresh-men won through a safety. These men won through a safety. These games have been annual affairs for several years and it is safe to say that never before have they been de-

PROSPECTS FOR

Conditions in 1926 World Series Accentuate Probability of Further Action

Prospects of a still earlier closing of major-league baseball seasons in 1927 are seen by close students of the sport, following the World Series of 1926 which, like its predecessor of 1925, culminated in the chill and poor atmospheric conditions of early October. Although the weather in which the last game of the series was played was not quite as poor as that during the last game of the 1925 series in Pittsburgh, nevertheless it was poor enough to arouse an even more favor-able leaning of opinion toward a shorter major season in order to leave and November in their entirety to football.

Perhaps the biggest reason, outside

of poor weather conditions in World Series contests, that supporters of the earlier closing for league seasons cling to is that there is apparently no rea-son why the schedules could not be completed early enough to start and perhaps finish the World Series before the first of October. As an Illustra-tion, the schedule of 1926 is cited. In the National League, for instance, tme time between Sept. 26 and Sept. 30, devoted entirely to the Boston and Philadelphia series, a series that meant absolutely nothing so far as the first division was concerned, or, for that matter, so far as any positions were concerned. The fans that flocked to Braves Field to see those last games could have been put in an ordinary lecture hall. And the play of both clubs was so listless and lacking in enthusiasm that it seemed the players might just as well have gone home three days earlier. Yet there had been many arguments extended during the drawing up of the 1926 schedules that playing 154 games before Oct. 1 was going to prove a difficult proposition. Both leagues finished their seasons before Oct. 1 with time to spare and with few scheduled doubleheaders, outside of the usual number, owing to

There is a twang in the air about the first of October that makes watching a baseball game not exactly pleasant. In 1925, a blizzard was in process during one of the scheduled days of the series. In the series just closed, the weather was better, but at least three of the days were uncom fortable unless one was wrapped up in an overcoat. The last day was one that called for a postponement. A regular season game would have been called under like circumstances. And a World to the weather in order that the best

Series game, which involves so much more than a regular season contest, should receive even more concessions eam may be the winner. Postponing a World Series game be-casue of weather involves many ob-stables. For one thing, fans are there from all over the country and do not care to be, and in many instances cannot be, held up in their plans of attending the games. Moreover, a postponement may favor one club's pitching staff and give it the balance

good weather conditions in a World Series are only fair to the players and spectators alike. And when the interests of players and spectators are concerned, it would seem that the better interests of the game were in the halance.

better interests of the game were in the balance.

The year, 1926, was more or less of an experimental year. The closing date of the leagues had been made almost a week earlier than usual. The lesson from 1925 is that those argu-ments which advocates of the later clos-ing brought forward previous to 1925 ing brought forward previous to 1925 were proved unfounded. The 154-game schedules were carried out with com-parative ease, enabling Philadelphia and Boston to stage a series all by themselves on the last three days Next season should be another ex-perimental year. It is obvious now that the seasons can be closed even earlier; how much earlier is a matter that league officials can best judge. But with the thought of an earlier closing still permeating baseball cir-cles, it is believed that something more will be done in this direction before the drawing up of the 1927 scheduler

HENRY RETURNS TO MAJORS NEW YORK, Oct. 18—The New York National League Baseball Club announced Saturday that it had bought Frank J. Henry, a left-handed pitcher, from the Indianapolis club of the American Association Henry used to be with the Brooklyn Nationals where he went from New Orieans. He was sent to Indianapolis by Brooklyn for J. L. Petty, who was the leading pitcher of the American Association in 1924.

WOMEN TURN TO INDOOR SPORTS

Basketball, Bowling, Volley Ball and Hockey **Attract Attention**

CHICAGO, Oct. 18—Turning from tennis, golf and swimming, more women are taking to the indoor athletic sports of bowling, basketball, volley ball and hockey than ever be-fore, accoring to observations made

here.

Basketball is becoming a tavorite and instructors are busy training condidates. Sectional and city-wide tournaments are to be inaugurated and a battle will be waged for championship trophies put up by park boards, poli-ticians and business houses. Women's basketball teams are recognized as important factors in developing com-munity consciousness in many of the foreign sections of the city.
Volley ball, though not so numerously followed as is basketball, is
gaining devotees and is an important

item in the sports programs of the item in the sports programs of the social workers.

Hockey has been steadily claiming more attention. Girls who have played basketball are especially valuable and at some centers former players of disinction in the cage game have deserted their old standby to become

At the Illinois Women's Athletic At the Illinois Women's Athletic Club, an Indoor hockey team is being organized by Miss Marie Wagner, who also trains that organization's basketball team. The new hockey club will represent the I. W. A. C. exclusively, and expects to book some exciting games during the season.

Bowling is perhaps the most popular, that stagen a firm hold on the inter-

This latter league is directed by Mrs. Zoe Quin. The members play on Thursday afternoons at the Wabash-Congress alleys and among their number. are some of the fastest bowlers in the United States.

Several hundred women bowl at the Wabash-Congress alleys, and they always draw a big gallery. Definite schedules are still to be made up for ournaments, but this year's struggle or city championships will doubtless be as strenuous as was that of a year ago. In one competition there were more than 500 women bowlers entered. It is planned to hold the entered. It is planned to hold the grand finals this season earlier than

WORCESTER (MASS.) TEAM LOSES WORCESTER (MASS.) TEAM LOSES
EVESHAM, Eng.. Oct. 18 (P)—The
soccer football team of the Sportsmanship Brotherhood of Worcester, Mass.,
Saturday met with its second defeat in its
invasion of Great Britain, losing to the
Evesham team 4 to 2. The Stourbridge
team defeated the American players on
Thursday, 5 to 2. Nuttall and McLoughlin
accored for the American team, which
missed many chances through hesitancy
in taking advantage of openings.

PEITZER LOWERS OWN MARK
HAMBURG, Ger., Oct. 18 (P)—Dr. Otto
Peltzer, German champion middle-distance runner, competing in a track meet
here yesterday, ran 1000 meters in 2m.
27.4s. This lowers his own and the previous world record, the latter made by
Sven Lundgren, 2m. 28.5s. in 1922. It does
not equal the figure of 2m 26.8s. set by
Seraphin Martin of France, which, however, has not yet been officially confirmed.

MIDSHIPMEN WIN 3 TO 0
ANNAPOLIS, Md., Oct. 18—The United
States Navai Academy defeated Swarthmore College at soccer football here
Saturday, 3 to 0, the Navy's score being
made with three desperately-won goals,
all in the first half.

COLLEGE SOCCER RESULTS Worcester P. I. 2, Brown 1. Annapolis 3, Swarthmore 0. Williams 1, Rensselaer 0.

RHODES LEADS THE BOWLING AVERAGES FOR 1926 SEASON

Carries Off This Honor for the Fourth Time Since 1920 in English Cricket-Yorkshire Veteran Uses the "Perfect-Length Spin," a Neglected Art

national cricket team, and, by the neglected art of perfect-length spin, bowling reduced the pick of Australia's batsmen to importence. All England's representatives played heroically in that game at the Oval, but Rhodes, J. B. Hobbs and Herbert Sutcliffe are the men whose part in the victory is an imperishable memory. Since Rhodes made his debut for Yorkshire many years ago, he hawon fame, not only as a bowler, but as one of the very finest all-round players of all time.

son forsook county for league cricket, Tate, the only man ever to score 1000 runs and take more than 200 mickets for three years in succession—he did so in 1923, 1924 and 1925—and G. G. Macaulay Yorkshire, occupant of top place last year. Just below Macaulay is Harold Larwood, a young and really fast bowler, who "same off" to great purpose in the final test match, and C. W. L. Parker, whose consistent excellence for Gloucestershire makes it all the harder to comprehend why he was not included

as one of the very finest all-round players of all time.

Twenty-three years ago he first performed the coveted "double event" of making more than 1000 runs and capturing more than 1000 runs and capturing more than 100 wickets, and this summer he repeated the feat for the sixteenth time. The value of the feat is heightened by the fact that this year it came within the compass of only seven men—Rhodes, J. A. New-

PENNIES BUY PALESTINE LANDS NEW YORK (AP)-Jewish land holdings in Palestine total more than 250,000 acres, of which 50,000 acres were purchased largely through pennies contributed by Jews in Ghettoes throughout the world, it was announced at the annual conference of the Jewish National Fund here. The 50,000 acres were pur-chased by the fund for the Jewish people, Judge Bernard A. Rosenblatt, chairman of the board, an-

ST. JEAN WINS MATCH NEW YORK, Oct. 18—Andrew St. Jean defeated William F. Hoppe in their three-cushion handicap billiards match here Saturday. He ran up a total score of 480 and Hoppe, despite brilliant railies, failed by two points to make the 600 required for winning under his handicap.

president of the University of Washington, but the labor men are joining the movement because of Mr. Hartley's alleged record against favorable labor legislation.

AMHERST, Mass., Oct. 18—Amherst College defeated Harvard University here Saturday in a soccer football match. 5 to 1. The superior pass work of the vorable labor legislation.

B-D IMPEDANCE COUPLED SET IS DESCRIBED

Popular Receiver Discussed by Co-designer of Transformer

So many requests have come in to this paper regarding the "latest" Browning-Drake receiver and so much confusion has resulted with the publishing of the same old set with some audio changes that we are publishing the Browning-Drake Impedance Five, which includes a true and tried circuit with the best obtainable parts including an imobtainable parts including an im-pedance audio amplifier which can hardly be excelled for tone quality.

By GLENN H. BROWNING In order to have one complete lay-

out of parts and continuous wiring diagram, the five-tube impedance coupled Browning-Drake receiver will be described. The layout suggested here is not necessarily the best one, but the writer believes that the average set builder is more sure of having an efficien set using this design than many of the others. This is because he apparatus is so placed that the important connections are necessarily short and well separated. Another good layout of apparatus is shown in Radio Broadcast, for Sep-tember, 1926.

Of course, some set builders desire to have the front panel look sym-metrical, and to that end separate the condensers and coils about 13 inches. This does not lessen the of the receiver if the high potential leads are kept well away m each other and precautions are taken in building.

The necessary apparatus for the construction of this receiver is given

VeriChrome panel 34 inches by 2. One subpanel or baseboard 23

2. One supparer or baseboard 2s inches by 7 inches.

3. One National Tuning Unit series with the antenna, is shown, though because of the uncertain though because of the uncertain capacity of fixed condensers on the market, a small variable air condenser, whose capacity (maximum) is about 1001 is recommended. The

unit.)
4. One National Unit BD2-B (This contains one .00025 mf. National Equicycle condenser with type B Velvet Vernier dial and one National Browning-Drake space wound transformer, also mounted as a unit.)
5. One Yaxley 30-ohm rheostat!
6. One Yaxley filament switch.
7. One .0001 mf. fixed or variable series antenna condenser (Precise 240).
2. One grid condenser .00025 to .00005 mf.
3. One gridleak, fixed or variable.

19. One 25 to 38-ohm fixed resist-

that the average set builder should have no difficulty in constructing a receiver which is selective, sensitive and easy to operate. A few gen-

Be sure the lead from the stator plates of the first tuning condenser runs directly to the grid of the first tube and is kept well away from other connections. This same cau-tion applies to the lead from the plate of the radio-frequency tube, to the primary of the radio-frequency stator plates of the second tuning condenser (.00025 mf) should run directly to the grid leak and grid the R. F. choke shown in the dia-condenser. which are located as gram. The National input impedaclose as possible to the grid of the detector tube. It is well to mount the grid leak and condenser directly on the grid connection of the detector socket. The grid leak and condenser should be some distance from other metal parts, otherwise the minimum capacity between grid and filament will be large and sta-tions on very low wavelengths can-

not be received.

The plate and grid leads on the audio tubes should be as short as convenient, though this is not as especial as in the case of the R. F. leads. The filament and B battery connections may be bunched to-gether, or run in the most con-

enient manner.

A UX199 tube is used as the R. F. amplifier and the 25 to 33 ohms resistance in series with the filament leads takes care of the difference in voltage between the small and large tubes, so that if a 33-ohm resistance is used, rheostat No. 1 may be turned completely on, when full volume is desired. This rheostat then acts solely as a volume control, though it will be found that turning it down

Impedance B-D An Attractive Set

hese Two Photographs Show How the Various Parts Are Arranged in the Most Popular of All the Brow Which Have Been Published Since This Famous Circuit Was First Introduced to the Public by This Paper, in June, 1924. Radio Broadcast Has Approved of This Type of Browning-Drake Set and is Sponsoring an Impedance Set With a Slightly Different Layout.

and increasing the regeneration on turned off, changing the setting of turn the rotor coil until the second

The 1. mf by-pass condenser across the B battery, can, in most cases, be omitted, if the B battery leads are the set may be balanced by tuning when a distinct click will be heard very short. However, if difficulty is in the whistle from the semidistant in the headphones, if the R. F.

about .0001, is recommended. The condenser made by the Precise Manufacturing Company is about the size of a balancing condenser, and may be placed behind the front panel and adjusted for the desired selectivity. This condenser may also be set so as to make the two tuning dials run almost together, provided an antenna of 60 feet, or over, is used. In connecting the .0001 to the first tuning circuit, if is advisable to ex-

periment somewhat to see whether point 1 should be connected to point 2 or point 3 in the schematic wiring diagrams. In the case of a long antenna, say from 80 to 150 feet, con-nection 1 to 2 is usually made, while with a short antenna, 1 to 3 works at the same time, as this would short circuit half of the antenna coil.

The connections for A and B bat-

5. volts. In the case of all UX192 tubes, or a combination of UX199 tubes with a UX120, the rheostat No. 2 should be turned to a point where

the voltmeter reads 3 volts.

It will be noted that severa! new devices have been added; among these may be mentioned the R. F. choke included in the audio circuit. It is not generally realized that in type of audio amplifier the radio-frequency from the detector ing distortion and, in the case of a control of oscillation very ursatisfactory. This effect is stopped by former, however, has this choke incorporated as a part of the unit, s

that a separate choke is not neces Either UX201A tubes may be used for the audio amplifier or two High Mu tubes with a power tube in the last stage. A very satisfactory com bination is a UX199 for the R. F. amplifier, a 201A or 200A for deector, two UX201A tubes for the first two audio stages with 90 volts on the plate and 1½ volts C bat-tery, and a UX171 on the last stage with 135 volts B battery and a C

battery, or from 221/2 to 27 volts.

Balancing the Receiver There are several ways that this receiver may be balanced, so that no radiation is sent out, and the maximum signal strength is obtained. Make all connections so that the set is in operating condition. Rheostat No. 2 should be turned to a position where the voltmeter (if one is used) reads 5 volts in the case where 201A tubes are used; or three volts in the case where 100 tubes are employed throughout. Turn rheostat No. I completely off and tune in a local station, by means of the two dials is in its socket, then set the balancing condenser so that the minimum amount of signal is received. When the set is balanced and the first tube

Tomorrow there will take place the formal opening of the Imperial Conference in London.

The Imperial Conference

The conference is composed of the Prime Ministers of the six self-governing nations which today make up the British Commonwealth of Nations, with other attendant ministers, and of the representatives of India.

As its name implies, it has no formal place in the British Constitution. It has no legislative or executive powers of its own. It is simply a meeting of the executive heads of the dominant peoples within the British Empire through which they can take counsel together and come to agreements about policy, agreements which are then referred back to their respective parliaments that alone can convert them into effective action. But the significance and importance of such a gathering needs no underlining.

The present Imperial Conference will be the ninth of the series. The Imperial Conference system began as long ago as 1887, the golden jubilee of Queen Victoria's accession to the British throne. That meeting was known as the Colonial Conference, for none of the numerous colonies of Australia or South Africa had been federated into dominions, and in Canada the Northwest Territories, now known as Manitoba, Saskatchewan, and Alberta, were still undivided and unorganized. The development from that date has been rapid. In 1907 the conference was constituted under its present title, and it was arranged that it should assemble every four years. During the war the dominions finally assumed their position of equality with Great Britain, a position which was recognized both in the treaties of peace and the League Covenant.

The program before the present conference does not promise anything sensational. The most important business will probably relate to the question of status. Though complete equality of status is the official theory upon which the organization of the British Commonwealth rests, there are a number of anomalies left over from the earlier time of colonial dependence. There is the question of the powers and method of appointment of the Governor-General, a matter which has been in controversy during the recent general election in Canada. There is the question of appeals from the dominion courts of justice to the Privy Council in London, as a kind of Supreme Court for the Empire, a practice about which there is no uniformity today. There is the whole problem of the function of the Crown and its relations to the various responsible ministries in each self-governing part of the Empire.

There is also the very important question of the control of foreign policy. Under international law the British Commonwealth is a single state, all of whose citizens go to war and make peace together. Under modern British constitutional theory each nation within the Empire has the right to an equal voice in the formulation of foreign policy. In practice, however, effective consultation between governments situated thousands of miles apart is at present impossible, the dominions governments are too preoccupied with their own internal affairs to be much interested in foreign policy, and the necessity for prompt decision results in the British Government actually doing the work more or less on its own. The dominions, therefore, are technically in a position in which they can be committed to belligerency. combatancy, by the act of the British Govern-

The general aspects of this problem, with special reference to the wisdom of the method of attempting to solve it adopted under the Locarno treaties and of the representation of the dominions on the Council of the League of Nations, will certainly come up for discussion. There is also likely to be consideration of the question of how communications between the British and the dominion governments can be improved, for at present they are more cumbersome and ineffective than those which exist between foreign powers. There is also certain to be much debate about the development of the vast economic resources of the Empire and the possibilities of promoting inter-Imperial trade, and of the future of Imperial tariff preferences. Fortunately there does not seem likely to be any acrimonious quarrelling, for the flag question which is now distracting South Africa, and the problems of Indian migration within the Empire which used to cause much trouble, do not seem likely to come before the conference in any provocative form.

The discussions at the Imperial Conference cannot fail to be of interest to students of international politics. They will be interesting not only because they concern the policies and concerns of a great and friendly community of peoples but because the Imperial Conference is a forum in which is being worked out one of the most interesting international experiments at the present time. It is generally recognized that the principal stumblingblock to international peace today is the excessive nationalism of the modern world. The modern British Empire is perhaps the most important and successful of all the attempts which are being made to combine the virtues of nationality with loyalty to and membership of a larger commonwealth composed of many nations.

Many financial authorities appear ready enough to criticize the so-called cotton interests

of America for seeking credit aids to carry them over the present appar-Aid for ent emergency resulting the Cotton from the unusual decline in the price of the staple Planter The later reports from Washington indicate that

President Coolidge is perfectly willing to have members of his Cabinet work out a solution and to assist in the coordination of all agencies to relieve the alleged plight of the southern planter. That is consistent with his attitude displayed toward the wheat farmers. But it was indicated that a credit of some \$30,000,000 has been set aside and that private bankers are being petitioned to lend their assistance so that cotton can be stored and thereby held off the market until there is a price reaction enabling the planter to obtain a larger return on his crop.

According to the latest estimates of the Department of Agriculture, the United States will this year produce a cotton crop of some 17,-000,000 bales, which would be the largest crop in history. It would be nearly 1,000,000 bales larger than the crop of last season, or nearly twice as much cotton as was raised during the seasons of 1921 and 1922. The petitioners are said to be desirous of holding some 3,000,000 bales off the market, which, if actually accomplished, would bring the marketable crop down to a figure equal to some of the low-crop seasons. It is apparent that the figures have been exaggerated in order to bring home forcibly the need of rendering the cotton planter some service and of checking the price decline on the exchanges. According to the records, cotton usually reaches its lowest price during August and September. That is the season when most of the cotton is sold by the planter. Last year about this time cotton was selling for twentythree cents on the farm. A decline to less than fifteen cents within twelve months seems to be radical drop.

What President Coolidge is advising, i. e., a co-ordination of all agencies which might render assistance to the southern planter in the present emergency, is reasonable. It seems to be a very proper step, as it does not anticipate the diversion of any legitimate agency to render an unwarranted service to any particular class. Rather, it is a recognition of the fact that to market the present large crop of cotton will require a large bank credit, and that the crop must be marketed in an orderly fashion if a full and fair price is to be paid for it at the farm. There is always the possibility that the farmer will be forced to sell at harvest time and take what the speculators wish to pay. On the other hand, the manufacturers and consumers are not ready to possess themselves of large stocks at this time, despite the fact they may be tempted somewhat to do so by the abnormally low price existing.

Someone must accept delivery of the crop and hold it for sale to consumers as demand is expressed. If bank credit is extended in such a way as to accommodate the legitimate producers of cotton and to deny accommodations to speculators in the commodity, there will result a benefit to both the planter and the manufacturer. This is a problem much broader than the mere question of the present price of cotton-it is one in which the whole system of marketing is put to test. It is a problem much broader than the mere extension of banking accommodations to a group of cotton planters-it is one of rendering to the producers a just part of the price ultimately paid by the consumers.

While it is true that conditions in some of the countries of Europe became so bad a few years ago that the strong hand

Dictatorships

and

the Case

of Spain

of the dictator appeared to be the only resort left wherewith to cope with the problems presenting themselves, it is also true that dictatorships have not always worked out to the best interests

of the people. It may be granted that certain beneficent reforms are often instituted under such régimes, but there is almost always also developed among the people upon whom they are imposed a tendency to fall into a state of complete subserviency, lacking even blance of liberty.

Spain for centuries has been a nation that has shown but little interest in political freedom. It has been held in bondage by secular and religious institutions, and it has manifested only a slight desire to throw off the shackles that have limited its sense of independence. The imposition of a state of dictatorship, therefore, in 1923 did not involve any great change in outlook for the ordinary folk of Spain. They had been schooled to regard those in authority as being in a class beyond themselves, and they took it for granted that they were to obey implicitly, and more or less unthinkingly, any who were holding the reigns of government.

The outside world hears but little concerning actual conditions in Spain, but the facts are one by one coming to the surface, as is almost inevitable in such a case. There have been some stories published in the last few weeks, for instance, dealing with the plebiscite recently held in Spain, in which one reads that almost 6,000,000 Spanish people (a record number) registered in favor of the Government during the three days of voting. And the assurance is given that the "Spanish Premier's position is regarded as never more secure." Also, a little information has come to hand relative to a revolt of the artillery. But, due to the strict censorship, practically nothing has been printed as to the state of thought of the people who took part in the plebiscite or concerning the actual

manner in which the revolt was handled. Some intimations which have been brought to notice from a private source, however, indicate that things in Spain are far different from what the Premier would have it appear. For example, it seems that, though technically free to sign or not, those in the rural districts who did not sign the vote of confidence were liable to a fine from the mayors of the districts in which they lived, and those in the larger cities holding public offices who did not sign lost their positions. Further, it is alleged that in the schools the masters were instructed to make all the pupils sign, even the very young ones. And while the legal age is eighteen, the heads of families had permission to sign for themselves and their wives and children. Similarly, the handling of the artillery revolt was given publicity in such a way as to make it seem that it had been taken care of in a most tolerant manner. Information obtained from other than government sources makes it appear, however, that it was handled by giving to the entire artillery a "licensia," or period of leave for four months, which in effect amounted to a complete disbanding of its entire

personnel. A similar result may apparently be expected everywhere, when the people from one motive or another forgo their rights as individuals entitled to liberty of judgment and action, to accept unqualifiedly the judgment and rulings

of an autocrat. It is in such a fact that one of the strongest arguments for the validity of the democratic ideal may be found. Often it is little more than simple indifference that is the cause of the acceptance of such despotic government, but no matter what the cause, the result is the same: the creation of a state of dependency among the people that does not make for true happiness or prosperity. No matter how unfortunate a situation is, it is not helped by the acceptance of a condition that involves the complete domination of the will of one individual by that of another.

Acting unofficially as a special emissary of Mayor Walker of New York, Mr. August Heck-

scher recently visited several of the larger cities in Europe for the pur pose of determining what steps can be taken in the effort to rid New York's lower East Side district of its slums. He has returned to propose

Can the Slums Be Eliminated?

the expenditure, continuing over a decade, of a total of \$500,000,000, to be raised by contributions from wealthy persons in sympathy with the project, in replacing the squalid tenement. and hovels with so-called model tenements.

At first blush the plan seems to offer a happ solution of a vexing and continuing problem. But there at once arises, 'as the processes of its working out are studied, some doubt as to its practicability. It is discovered, as one considers the matter, that the problem of the slums is a relative one, its importance depending quite largely upon the size of the city or town. New York's East Side has for years been the refuge and abiding place of hundreds of thousands or persons who have never known any better onditions of housing and sanitation than those which exist in the area which it is planned to reconstruct. In eities of lesser size, almost without exception, there will be found those who, more from choice than from necessity, seek out and inhabit the unsightly places.

There is an inescapable tendency to suspect that unless or until the supervision of such a reconstructed area as that included in the plan proposed in New York is taken over by public officials or by the representatives of those who may agree to contribute the necessary funds, the same habits of thought and the same tendencies toward carelessness in preserving the orderly arrangements which it is proposed to inaugurate would soon give the new tenements much the same undesirable character possessed by the ones which it is planned for them to displace. Human nature, whatever its condition, cannot be arbitrarily changed or bettered by changing its environment. The transforming process, to be effective, must be more than merely superficial.

But there are gratifying indications that what it is sought to accomplish in the congested New York slum district is gradually being brought about by conditions which have made it possible for many who prefer better surroundings to find them. There is gradually operating in the United States a process of decentralization, aided by new and improved methods of transportation, which is making it possible for the worker to reside miles from his factory, store or shop, as well as for industrial plants themselves to locate beyond the boundaries of the cities. It is stated that there has been a decrease of 400,000 in the population of Manhattan Island since 1910. It may be that if this movement could be aided and encouraged the expense of rehabilitating the East Sid ments still filled to overflowing might be considerably lessened.

There would seem to be no doubt that much of the ground occupied by these unsightly houses will, at no remote period, be needed for manufacturing and business purposes. There will always be those who believe it necessary to make their homes near their work, and provision must be made for their reasonable comfort. But the great army of the employed has been made mobile by the flivver, the motorbus, the subway cars and ferries. The progressive and thrifty worker deserves better housing than the slums afford, but he is not disposed to accept even the most generous charity as a means to the desired end.

Is it too much to expect that sometime, and perhaps sooner than has been hoped, the slums of all the cities, large and small, will purge and purify themselves? If one's surroundings reflect more or less faithfully a state of consciousness, thereby tending to disprove the theory that it is the environment that controls and governs. then the great work of reconstruction and rehabilitation must begin elsewhere than in providing a new setting for that which adapts itself more readily to the old.

Editorial Notes

A correspondent's description of an abandoned New Jersey town in a district once dotted with big iron furnaces, which made America the world's leading pig iron producer a century ago, illustrates vividly the progress in this industry. Sir Henry Bessemer's discovery of the blast process and the substitution of coke for charcoal revolutionized manufacture and smelting When the United States Steel Corporation was formed a quarter of a century ago, three-fourths of the steel made in America was Bessemer. Now open-hearth steel has practically supplanted Bessemer. Steel today is undoubtedly the world's most valuable metallic product, since it is practically indispensable to modern civilization. And there still remain opportunities for inventive thought to improve its methods.

The Republic of Panama has imported 500 rifles and 60,000 cartridges from England to arm its constabulary, explaining that it had no protection when Costa Rica recently was at war and during an uprising of the San Blas Indians. Panama seems to have emerged from both occasions unscathed. It might be called to the attention of the international conference on traffic in arms that if some foreign nation had not armed the San Blas Indians and the warring Central American republics, Panama might not now he preparing herself to shoot down her neighbors or her own aboriginal

The Diary of a Political Pilgrim

FROM A LONDON CORRESPONDENT

interesting to travel in than the United States. The visitor, however, does not visit it for its scenic beauties, as he does Europe, for most of these are situated far away in the West. Nor does he visit it for its monuments of ancient civilizations now passed away, nor for peculiarities in dress and custom, as he does the Orient. If he is wise he will visit it because it is the most active of all the laboratories in which humanity is being remade at the present time.

What is most interesting in the United States is the people composing it. Nowhere else is to be found a mass composed of so many races, in which the individual is galvanized into a more active and vital self-expression, in which social and economic experimentation is going on so intensely, in which there is more buoyant optimism about the future. Whereas in other lands, institutions, the past, culture and the arts compete for attention, in the United States the individual man or woman occupies the middle

One cannot help wondering, as most Americans do where all this fermentation is going to lead. The United States has always been a land of change. It was founded by individuals who sought a change from the oppressive or stagnant conditions of the Old World. Yet colonial society is generally described by historians as having become "phlegmatic" and almost a part of Europe again, before the Revolution. It was the opening up of the West which restored vitality and movement to America, as the West has been the chief purce of its constant rejuvenation ever since.

But the pioneer phase is now definitely passed. The frontier has gone, the era of railway expansion is over, the day of free land is no more, the immense tide of immigration from Europe to the East and from the East to the West has been checked, the primary equipment of the land with roads and bridges, houses and schools and churches, factories and public buildings is almost complete. The United States is at least as well equipped for the development of a cultural civilization as Europe has

ver been. What is that civilization going to be? Some of the new foundations upon which it will rest can be seen. It will be founded on mechanism; it will be fundamentally urban in character; though individualist it will also be intensely social in its nature. The fact that the next phase of American civilization will rest upon the machine needs no demonstration. It is the only way by which at present humanity can escape from the interminable drudgery of providing for its essential wants which has beset all ages. Older civilizations have been open to aristocracies only because they have rested upon slavery or the exploitation of cheap labor. Modern civilization will be open to all because it will rest upon the machine

That it will be urban and not peasant or rustic in character is also evident. Already the urban population of the United States is 60 per cent of the whole. The drift of the farming population to the towns is one of the most obvious movements of the time. The modern civilized man and woman are increasingly unwilling to face the drudgery and isolation which their fathers used to regard as freedom and are more and more dentanding the regular hours, the ready money wages, and the social pleasures and recreations of town life.

It may be that Henry Ford's dream that farming can be mechanized as manufacture (which literally means making by hand) has been mechanized, will some day come true. But if so it will only mean that rural life will approximate to urban life, as to some extent it is already doing. The automobile, the radio, the gramophone, have largely eliminated the monotony incident to rural life.

THERE is no country in the world today that is more | in transportation the gregarious and social amenities of the

town may be reproduced on the prairie also.

These changes, however, are raising quite new social and moral problems. Take the effect of the automobile on the home. A chart of the recent tendencies in buying will show a diminution in the quantity and a deterioration in the quality of the articles used to embellish the home. Much of the money and much also of the time which used to be more tindence is now ment in the automobile. It has Much of the money and much also of the time which used to be spent indoors is now spent in the automobile. It has even been said that the automobile is both the parior and the nursery of the modern wife. This assuredly produces a certain freedom and expansion of outlook, but it weakens also some of those essential social foundations which have been recently destroyed in Russia with such disastrous effect.

Take again the immense increase in wealth and the resultant preoccupation with what money can buy. With many business has become a religion, idealized with a certain moral uplift. Business efficiency and right business ideals are essential, but can business, more business, and better business, be the summum bonum, the all-sufficient end, of a truly civilized existence? The piling up of wealth has been perhaps the greatest cause of the collapse of the civilizations of the past. No nation has as yet solved the problem of preventing great wealth from materializing and corrupting its vital currents. It is a problem which stares modern America right in the face.

modern America right in the face.

Fortunately there are voices already crying in the wilderness. The critical faculty, so essential to the exposure of shams and illusions, so vital to self-knowledge (though so barren when used as an end in itself), is much more active than it used to be. The tradition of a native art and literature, almost destroyed by the Civil War and the great western expansion after it, is once more vigorously revived. Though the popular thought is still preoccupied with the manufacture and acquisition of "things," its exuberant vitality and enthusiasm, out of which the nobler elements of American civilization must be built, are un-

There is the universal zeal for education, manifest in an equipment of schools and colleges and universities which can give higher education to a larger proportion of the people than has ever been dreamed of in human history. There is the growing interest among the "intel-ligentsia" in international problems, the sphere in which, as I hope to show in another article, the United States is destines to play an ever-increasing part. There is portentous moral reform known as prohibition. portentous moral reform known as pro-

It is inevitable that so drastic a reform as this latter should provoke much public controversy. But no can dim the fact that the United States was the first natio

can dim the fact that the United States was the first nation to give the direct challenge to a sensual human appetite and to the commercial interests which sought to profit by exciting and gratifying it. Nor is this controversy really to be regretted, for it is probably making more people think out the liquor problem for themselves in all parts of the world than anything else could have done.

But when all is said and done America's greatest contribution to modern civilization is the independence and vitality it has given to the ordinary citizen. The Declaration of Independence was far more than a declaration of independence from Great Britain. It was also a declaration of independence for the individual, independence from the past just because it was the past, independence to strike out any line which might seem to him the best regardless of authority, independence to be himself. And though this independence has brought problems and difficulties of its own, mass suggestion, the tyranny of the low-brow, the intense collision between good and evil coming to the surface everywhere, it contains within itself the liberation from these things also, for unless a man thinketh liberation from these things also, for unless a man thinketh With the industrialization of agriculture and improvement | for himself, what kind of a man can be be

The Week in Geneva

GENEVA of the various departments of the League of Nations, there have been a crowd of other attractions for visitors to Geneva, in the meetings of the international societies. which to the number of forty-one have their headquarters in this city: Subjects of world-wide interest are discussed in these conferences, which included this year the International Conference on Peace, the meeting of the International Parliamentary Union, and the bazaar of the Federation of the Christian Associations of Students in the Forum of Geneva, a classical building near the theater

Each country in the federation had its own stall, with ladies dressed in national costumes selling an immense variety of products, from Swiss cuckoo clocks to Czechoslovakian dolls and Greek statuettes. The Russian stall was one of the most interesting, for many Russian refugees in Europe had sent their handiwork to be sold. But the Belgian stall presented its goods in the most artistic manner. Every day while the bazaar continued there were lunches, dinners, soirées, etc., to celebrate the work of the Association of the Christian Students in the various countries concerned. Thus there were Russian, Greek and Polish dinners, and Hungarian and Bulgarian social parties. an American family dinner and a soirée Française and soirée Suisse. There was also an Armenian dinner, at which the fare was that given to the Armenian refugeessoup, rice and cocoa. All these social events were accompanied by lectures and celebrated with music and national songs, and sometimes dances in national costumes.

The Alabama room in the City Hall of Geneva, where the famous arbitration award was signed in 1872, was, not long since, the scene of an interesting ceremony, when Admiral Drury-Lowe, on behalf of the British League of Nations Union, presented a picture to the Republic and Canton of Geneva as "a token of the appreciation of the Union of all which the Alabama Act signified." The admiral recalled the circumstances of the Alabama conference, which so deeply affected national sentiment that it threatened to estrange the two nations, and remarked that, heavy as the fine which Great Britain consented to pay appeared to be, there was much more involved in this matter than money, for the alternative was war. The Alabama award proved that "even questions involving national honor could be settled by arbitration instead of war.'

The picture, which is by Robert Austin, represents a sower casting his seed along the newly upturned furrows, and in the background is a plow. Under the picture is written this text from the book of Genesis (47:23): "Here is seed for you, and ye shall sow the land." Alexandre Moriaud, president of the Swiss Council of State. warmly thanked the British Union for the gift, which he said would serve to remind future generations of a date which had become famous in the history of the world. The Genevese are proud to think that their city, which has now become a symbol of the value of arbitration, should have been chosen as the place in which the first of the great arbitration treaties was signed.

Many American and English tourists visit the Alabama room, in which may be seen the chairs used by the Arbitration Tribunal in 1872. A portrait of Captain Semmes who commanded the Alabama, also hangs in this room It was presented by the Daughters of the Confederation of the Southern States of America. But the most interesting object is the "Plough of Peace," beaten out of the swords of American officers to commemorate the centenary of the foundation of the United States. After being exhib-

TT WOULD require a regiment of reporters to keep the city of Geneva and placed where it is at present, with track of all that has been going on in Geneva during an inscription which expresses the hope that it might throughout the world." Another thing of particular in-terest to American visitors to the Alabama room is the "Bell of Liberty," made from fragments of the bell that was cast out of swords and cannons used in the War of Independence, the Mexican War and the War of

* . * * One of the most interesting celebrities in Geneva recently was Dr. Nansen, who with his still upright figure, white hair and keen eyes, retains his enthusiasm for polar exploration. The story of the Fram, the ship on which he penetrated into the Arctic regions, and which finally emerged as he predicted after three years of drifting with the ice, into Norwegian waters, stirred the imagina schoolboys a generation ago. But to hear Dr. Nansen telling his adventures again was a great experience for the grown-ups who attended his lecture at the International Club in Geneva.

There was a breathless moment when he explained how he lost his canoe, which contained everything he and his brave companions who left the Fram to complete the journey over the trackless ice, possessed. Dr. Nansen had to swim out to recover it, which he finally did, for the wind, which was carrying it away from him, veered to the right quarter just in time. Everyone in the room knew, of course, that he got on board that canoe, although the wind swept it away from him at first when he was attempting to do so. But so graphically was the story told that one looked twice at Dr. Nansen to see that h was still there!

The sea gulls (les mouettes) have already returned to the Lake of Geneva, which is regarded by the Genevee as an infallible indication that the winter will be a good, old-fashioned one, such as is dear to the hearts of lovers of Swiss winter sports. These birds are under the protection of the city, and however hard the winter may be, they are always assured of a plentiful supply of food.

Letters to the Editor

Brief communications are welcomed, but the editor must remain rudge of their suitability, and he does not undertake to hold himself this newspaper responsible for the facts or opinions presented. Am mous letters are destroyed unread.

"Ask the Librarian"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: The article of recent date, entitled "Ask the Librarian," roused my memory to present many familiar faces of those who frequented a certain public horary fifteen years

The questions asked me as head of the reference department were as varied and interesting as the faces. Many, too, were the humorous situations, one of which, as it happened, seems too good to withhold at this time. Perhaps it was the mention of feathers in the article

referred to which brought back the incident so vividly. The situation to which I refer was caused when a lady, middle-aged, intellectual and very precise in her manner, asked, "Tell me, please, is an ostrich a pachyderm?" (by way, the word was mispronounced "pashaderm")

My response must have been a very blank stare, and well it might have been, for I was not familiar with the word. At any rate, with a note of superiority, the inquirer's only comment was, "Dear me, you don't mean to say you don't know what a 'pashaderm' is? Tsi-tsi-tsi-tsi-tsi." Chicago, Ill.
